Apple News!

Apple News

- There's speculation that Apple may rename OS X to MacOS. This would be consistent with iOS, WatchOS, and tvOS.
- Apple is shutting down iTunes allowance for kids. (Most people's response: "What is iTunes allowance?")
- Apple reported that the average iPhone user unlocks their device 80 times per day, & 89% use Touch ID

Apple News

- Apple announced a new version of its 12-inch Retina MacBook. It has 15% to 18% faster CPU Performance, 25% faster graphics, one hour longer battery life, and a new Rose Gold color option. It costs the same as the previous model.
- Apple also increased the memory on its MacBook Air to 8GB
- You might want to hold off on any Apple purchases until after the June WWDC conference.
- Apple has patented an ultra-compact folding telephoto lens for mobile devices. We might see this on future iPhones.

Your Questions

Question

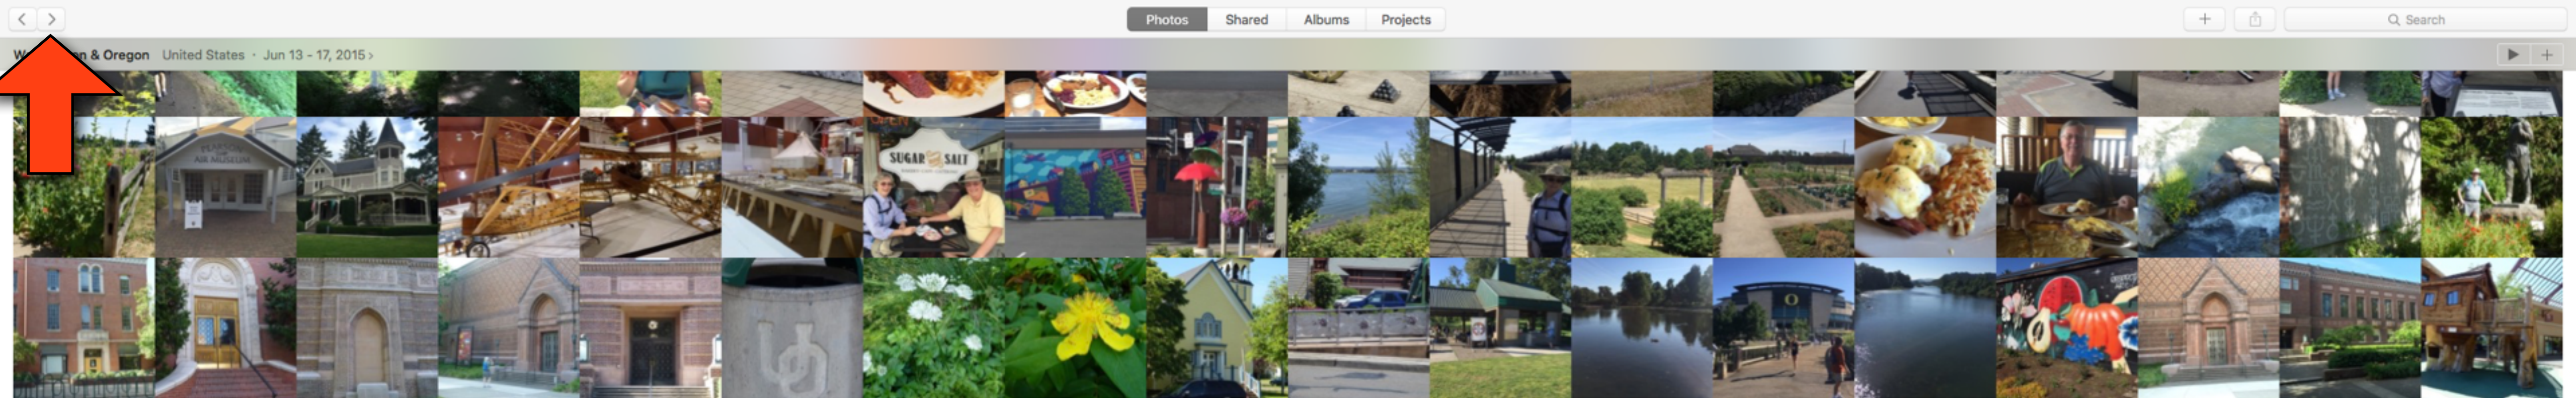

- How do you organize photos within the Photos app on the Mac?

Organization in Photos

- Photos automatically organizes your photos and videos by time and location using the Moments, Collections, and Years views
- A Moment is a group of photos and videos taken around the same time and in the same place — a walk in Eugene, Oregon
- A Collection is a group of related moments — my entire week in Oregon
- The Years view groups all of your photos taken in the same year. You can see your entire library at a glance. You can then drill down into your photos individually to find a specific group of photos.

Collections

Organization in Photos

- Apple also provides some pre-designed albums in the Albums tab:
 - All Photos
 - Faces
 - PhotoStream
 - Last Import, Favorites, Selfies,
 - Screenshots, Panoramas, Videos, etc...

Organization in Photos

- You can also manually organize your photos into Albums that you create
- Note: Albums do not actually contain the photos, just a pointer to the photos. Therefore:
 - You can include the same photo in multiple albums
 - If you edit a photo in one album, it's edited in all albums
 - You can delete photos in an album without deleting the actual photos.
- To create an album, first select the photo's you wish to include

How to select Photos

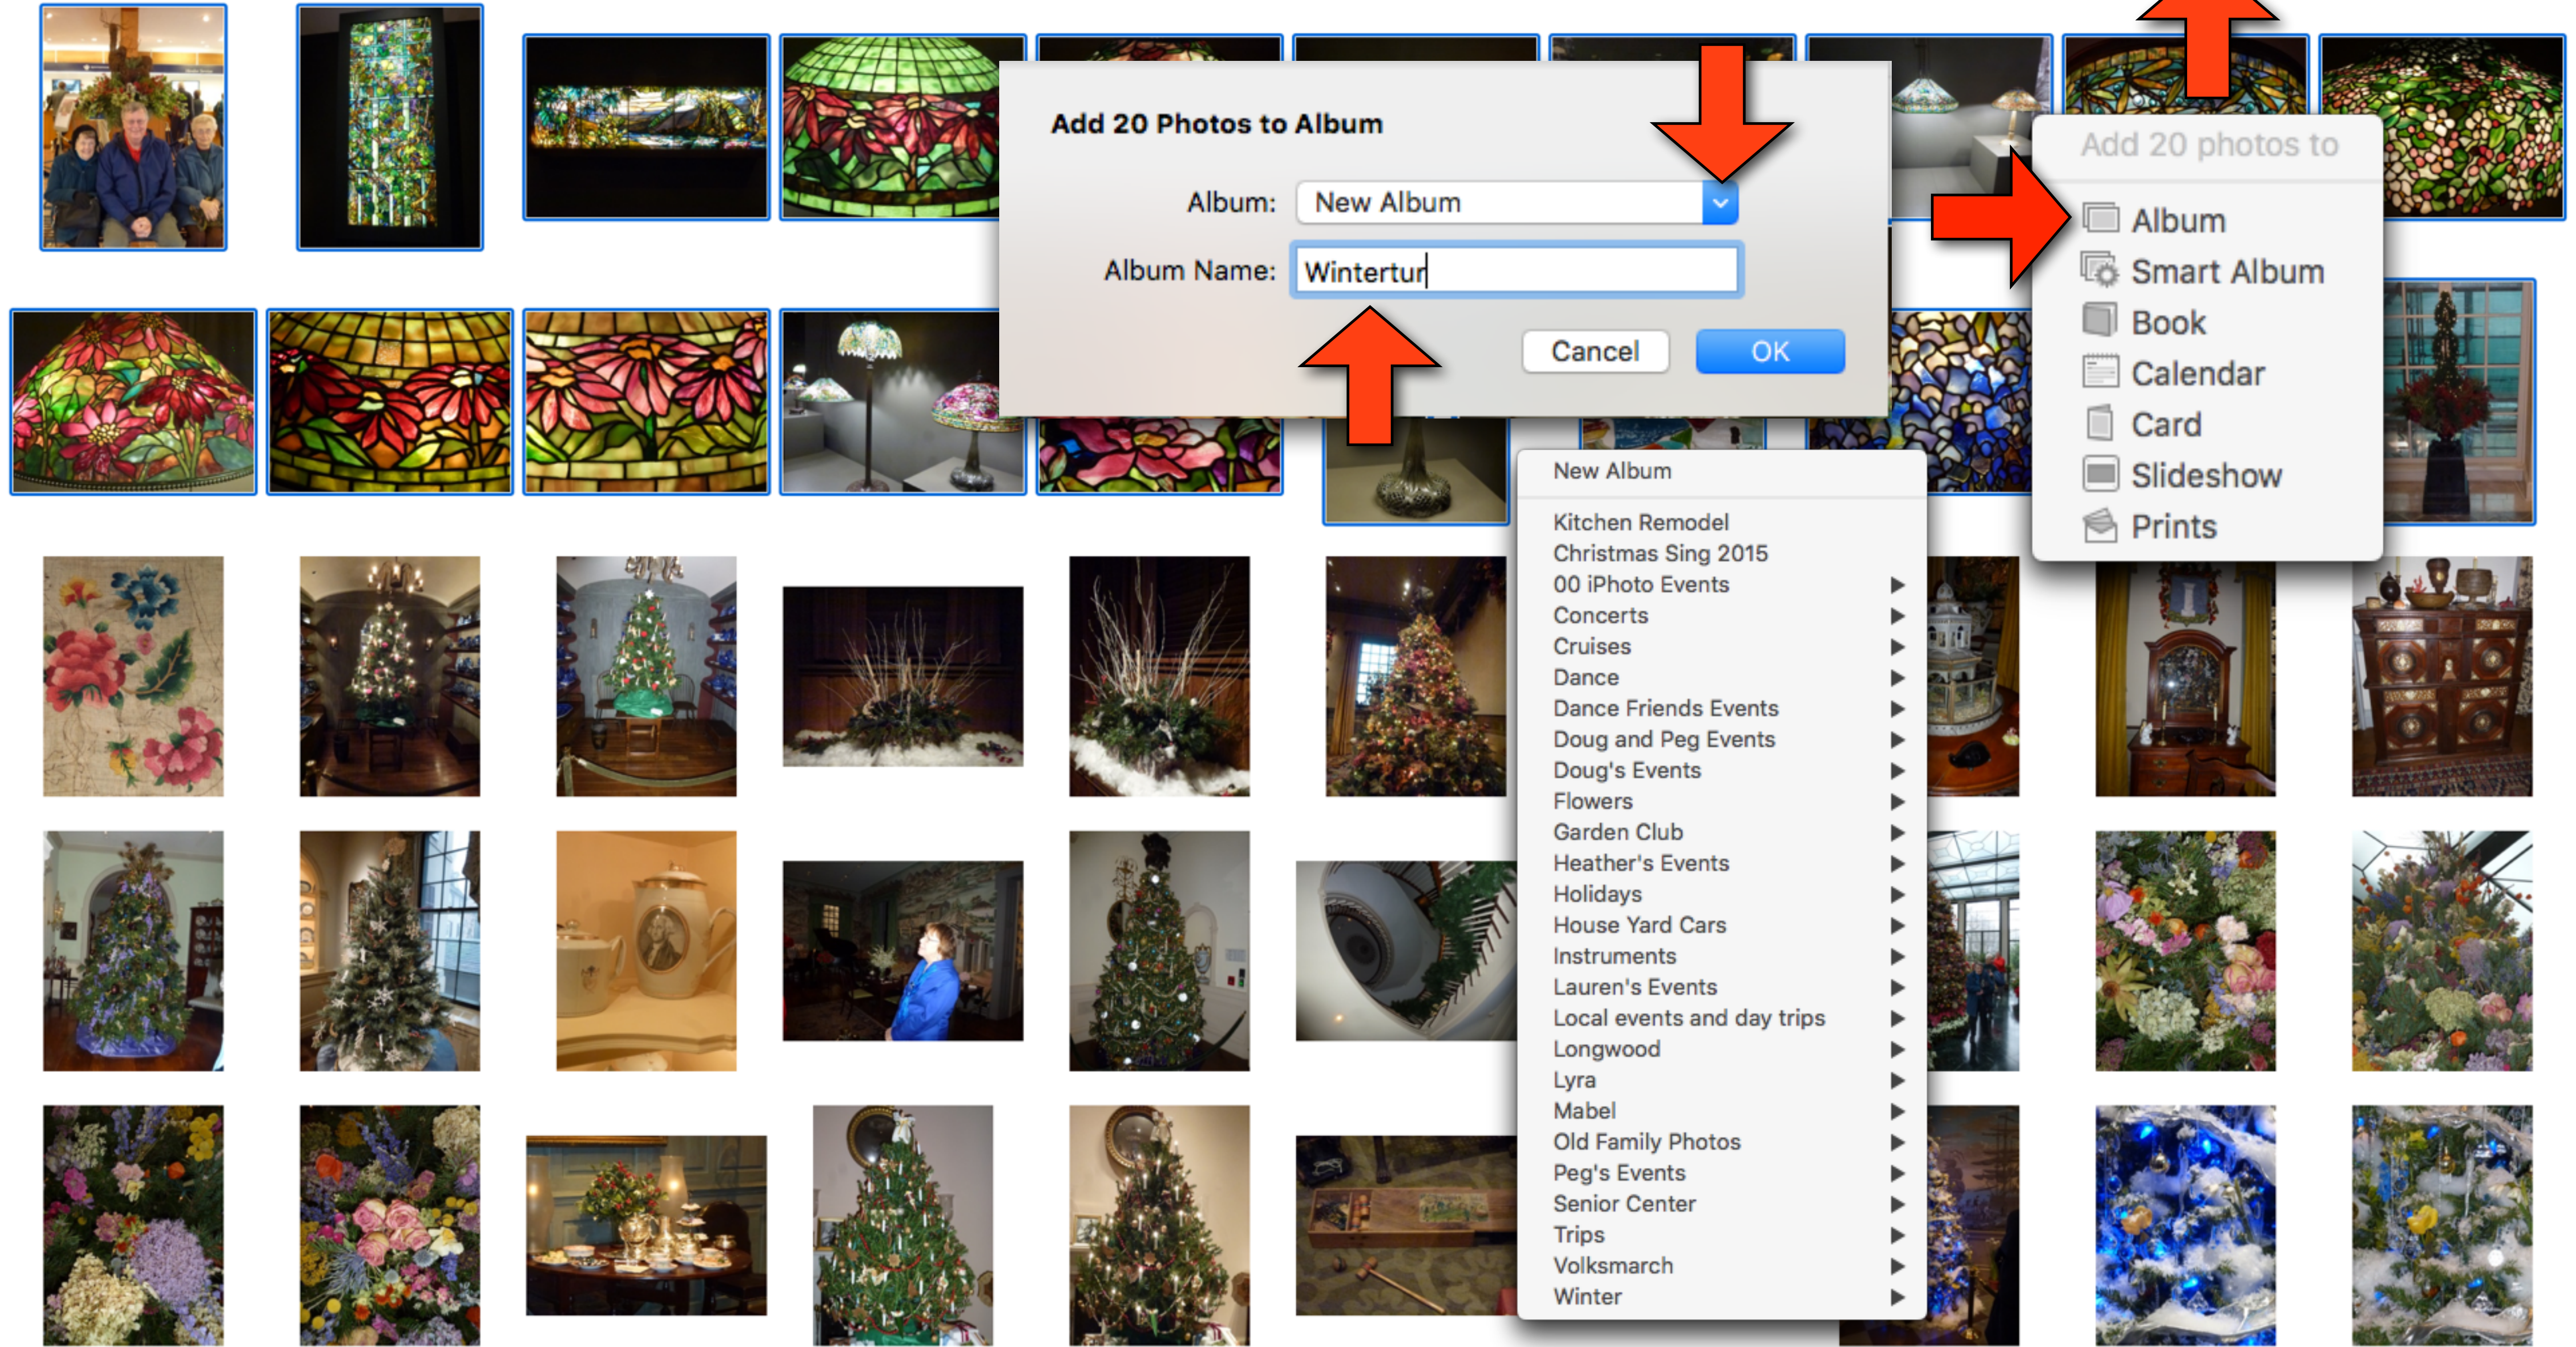

- Select a single photo: Click the photo or press the arrow keys to quickly navigate to and select the photo.
- Select a group of adjacent photos: Click the first photo, then hold down the Shift key while you click the last photo.
- Select photos that are not adjacent to each other: Hold down the Command key as you click each photo.
- Select all the photos: Press Command-A or choose Edit > Select All.
- You can also click and drag your cursor over a group of photos

Organization in Photos

- Once you've selected the photos you wish to include
- Click “+” in the upper right hand corner of the toolbar and choose Album
- In the next screen, if it's a new album, just type in the name you wish to use for the album
- If you wish to add the photos to an existing album use the pull down menu and select the existing album you wish to use.

Organization in Photos

- You can also organize your albums in groups by placing them in folders.
- For example, you might have several albums from cruises you've taken. You can create a cruise folder to contain all the individual albums
- To create a folder, go to the Albums view in the toolbar.
 - In the File menu, choose New Folder
 - Type a name for the folder
 - Drag the albums you wish to include into the folder
- To remove an item from a folder, Right-click the item, then choose Move Album Out Of [folder name]

**Easy Import**

Easy Import is available for many of the top recipe websites and will automatically import the whole recipe right into a recipe card.

To use Easy Import, touch the sites button, select the site you want, touch the search button on the keyboard, and the screen will pop up, and touch the easy import button in the upper right corner. Touch the done button to get back to the main app screen.

Custom Importer

The Custom Importer is for websites that are not available in the Easy Import list.

To get started with Custom Import, type the URL you want to import from, looking for, and then touch the Custom button found on the main screen. With the Recipe Name, tap and hold on the name of the recipe you want to import. You will see 3 options appear above your selection. Touch Name, Ingredients and Directions, and those will be captured into the recipe card.

You can edit the Name, Ingredients and Directions prior to saving. If you want to break up the directions, make spaces between lines.

To save a photo, tap and hold on the photo icon in the URL section. Manually enter the Servings, Cook and Prep times, and touch the save button, and everything will be imported into a recipe card within My Recipe Book.

Adding Custom Sites

To add a site you go to frequently that you like to use with the Custom Importer, navigate to the site by entering the url in the text box at the top. Once the page has loaded, tap the 'Sites' button, then the '+' button. You can use the 'Use Current' button to pull in the current webpage or type in as required. Then tap 'Save'. Now you can easily get back to this website without having to type it in every time!

Salisbury Steak Supreme Recipe

Edit

From: www.tasteofhome.com

Yield: 4 Servings

Categories: None Selected

Cook Time:

Prep Time: 15 mins

Ready Time: 15 mins

Ingredients

- 2 Medium red onions, divided
- 1/2 Cup soft bread crumbs
- 3/4 tsp salt free seasoning blend
- 1/2 tsp pepper
- Dash ground nutmeg
- 1 lb lean ground beef (90 lean)
- 1 tsp cornstarch
- 1 tsp reduced sodium

Directions

1. Thinly slice 1-1/2 onions; finely chop remaining onion half. In a large bowl, toss bread crumbs with chopped onion and seasonings. Add beef; mix lightly but thoroughly. Shape into four 1/2-in.-thick oval patties.
2. Place a large nonstick skillet coated with cooking spray over medium heat. Add patties; cook 5-6 minutes on each side or until a thermometer reads 160&dea<.

Beef Roast with Potatoes & Carrots One Pot Meal [Edit](#)

From: instantpot.com

Yield: 6 servings

Categories: Beef, Main Dishes, Instant Pot

Cook Time:

Prep Time:

Ready Time:

541 calories per serving

Ingredients

- 2 to 4 pounds beef roast no longer than the pressure cooker is wide
- 1 1/2 Cups Stock
- 1 Tbsp Olive Oil
- 2 lb Potatoes, roughly cubed (1 kilo)
- 1 lb of thick Carrots, peeled (not sliced) (500 g)
- 1 bunch of parsley, chopped

Directions

1. Press sauté to preheat the cooker. When the words hot appear on the display add a swirl of olive oil and sear the roast well on all sides.
2. De-glaze the cooker with chicken stock
3. Close and lock the lid of the instant pot. Press manual and then use the plus button to choose 45 to 50 minutes pressure cooking time depending on the thickness
4. When time is up, open the cooker

My Apple Experiences

Since Last time

- Since last month:
 - I bought a new bluetooth gadget to help with presentations
 - I've been learning Numbers and converted all my remaining Excel spreadsheets
 - To assist adding recipes manually, I paired an Apple Keyboard to our iPads
 - I took an old iPod touch that I wasn't using and figured out how to pair it to my car radio.

Since Last time

- I deleted most apps and loaded it with about 1000 songs
- Now, I use my iPhone to make and take calls in the car and the iPod Touch to listen to music, both paired at the same time
- The iPod is hooked up to a Belkin charger and starts and shutdown with the car and plays/pauses thru the car radio.
- I also purchased and installed an Amazon Echo. While this is not an Apple device, it should be. It's one of the coolest gadgets I've seen in recent history.
- This all lead to using and learning Pandora again

Satechi Presenter

- A bluetooth device that has a laser pointer and allows you to move forward or backwards in Keynote or Powerpoint
- Costs \$40 on Amazon and pairs with iPhone, iPad, Mac or any bluetooth computer/tablet
- To pair you just turn the device on and press the forward and backward buttons at the same time for 3 seconds
- Open your iPad and go to settings. Turn on Bluetooth and Select ST-APA. Can only pair w/one computer at a time.
- Only need to pair once.

Pairing Bluetooth Presenter

1. To turn the remote **ON** or **OFF**, press and hold the button on the bottom of the remote for **~3 seconds**.
2. Turn on Bluetooth on your device.

3. Press and hold both the **"Next slide"** and **"Prev. slide"** buttons for **~3 seconds**.
4. Select the remote (**ST-APA**) to complete the pairing process.

The indicator will blink blue

Apple keyboard

- Speaking of pairing, you can use an Apple Keyboard to pair with an iPad, iPhone, or a Mac
- You pair it once and after that anytime you turn the Keyboard on it pairs automatically
- When you have to do a lot of typing it is much much easier with the wireless keyboard than with the on-screen keyboard
- Note: the iPad Pro's keyboard is not bluetooth and doesn't require pairing.

Pairing an Apple keyboard w/iPad

- Ensure bluetooth is enabled on the iPad/iOS device you wish to connect: Settings > Bluetooth.
- On the Apple bluetooth keyboard, press and hold the power button. After about 5 seconds the keyboard power indicator (LED) will begin to flash indicating the keyboard is in pairing mode.
- When the desired “Apple Wireless Keyboard” device appears in the list of discovered bluetooth devices on your iPad, tap/select it to connect.
- The iPad will then prompt you with a 4-digit code to enter on the keyboard.
- On the keyboard, enter the 4-digit code and press the enter/return key. Your iPad should now be connected to the iPad.

Local vs Cloud Music

iPhone/iPad

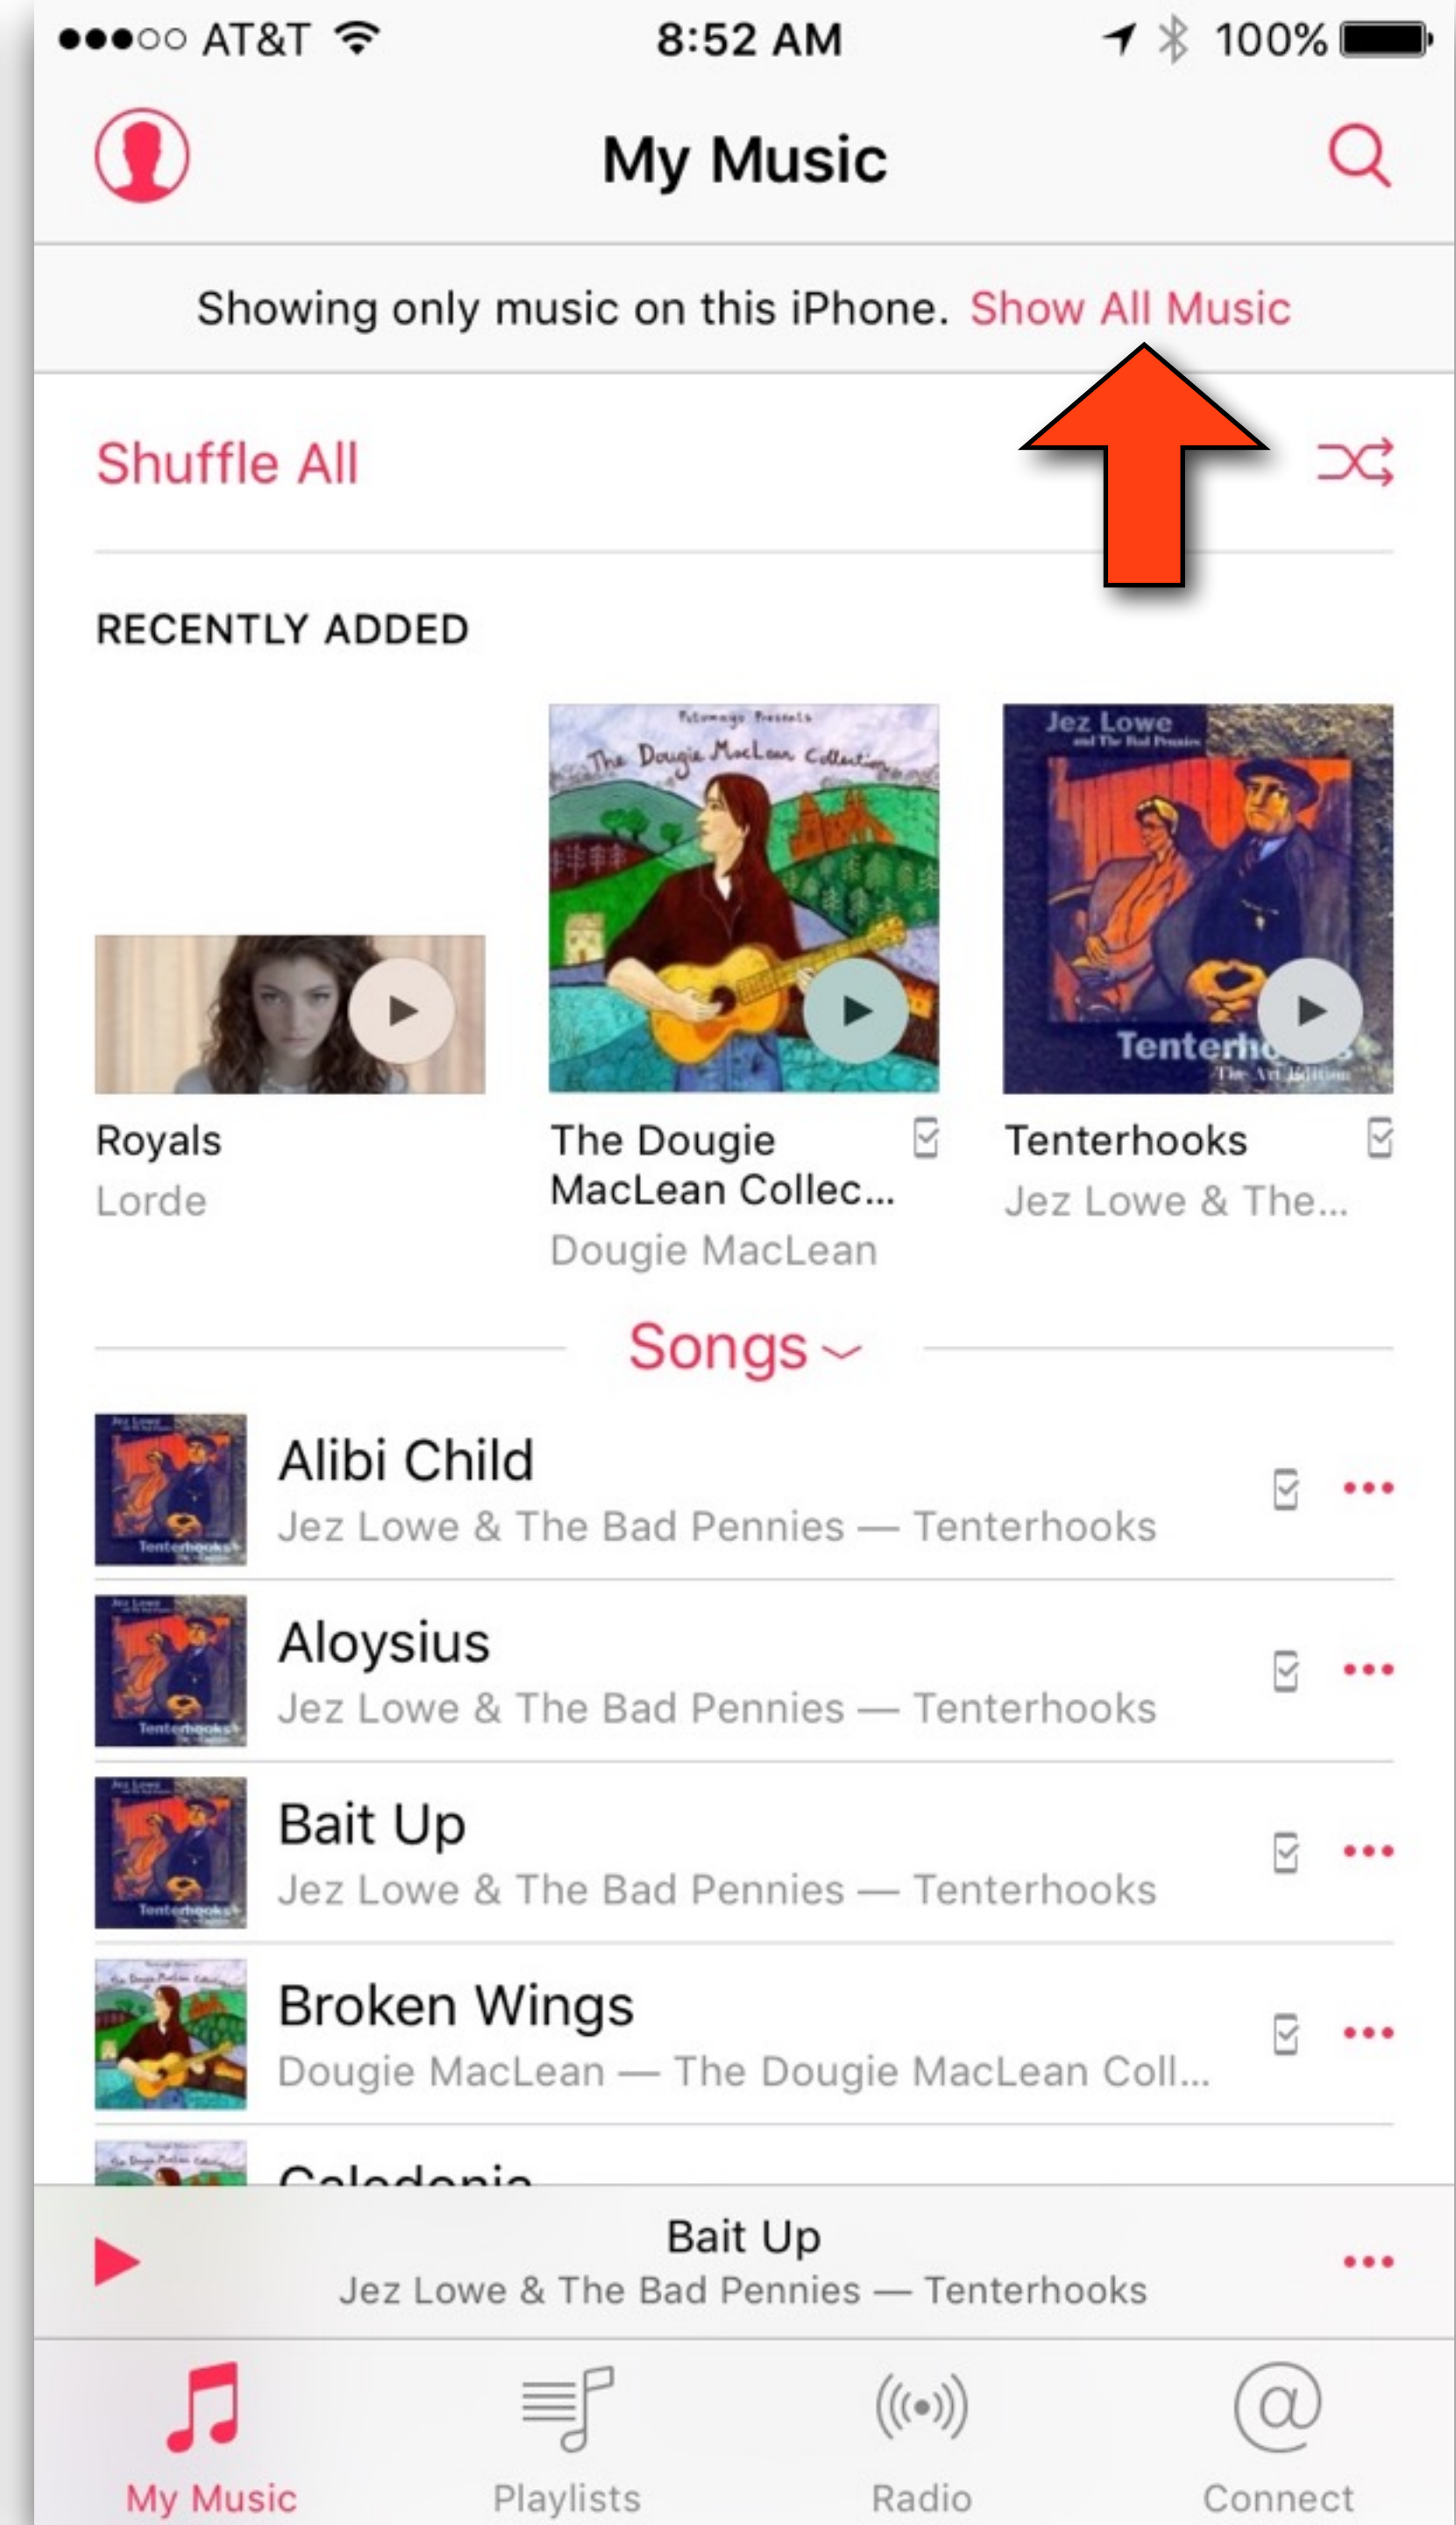

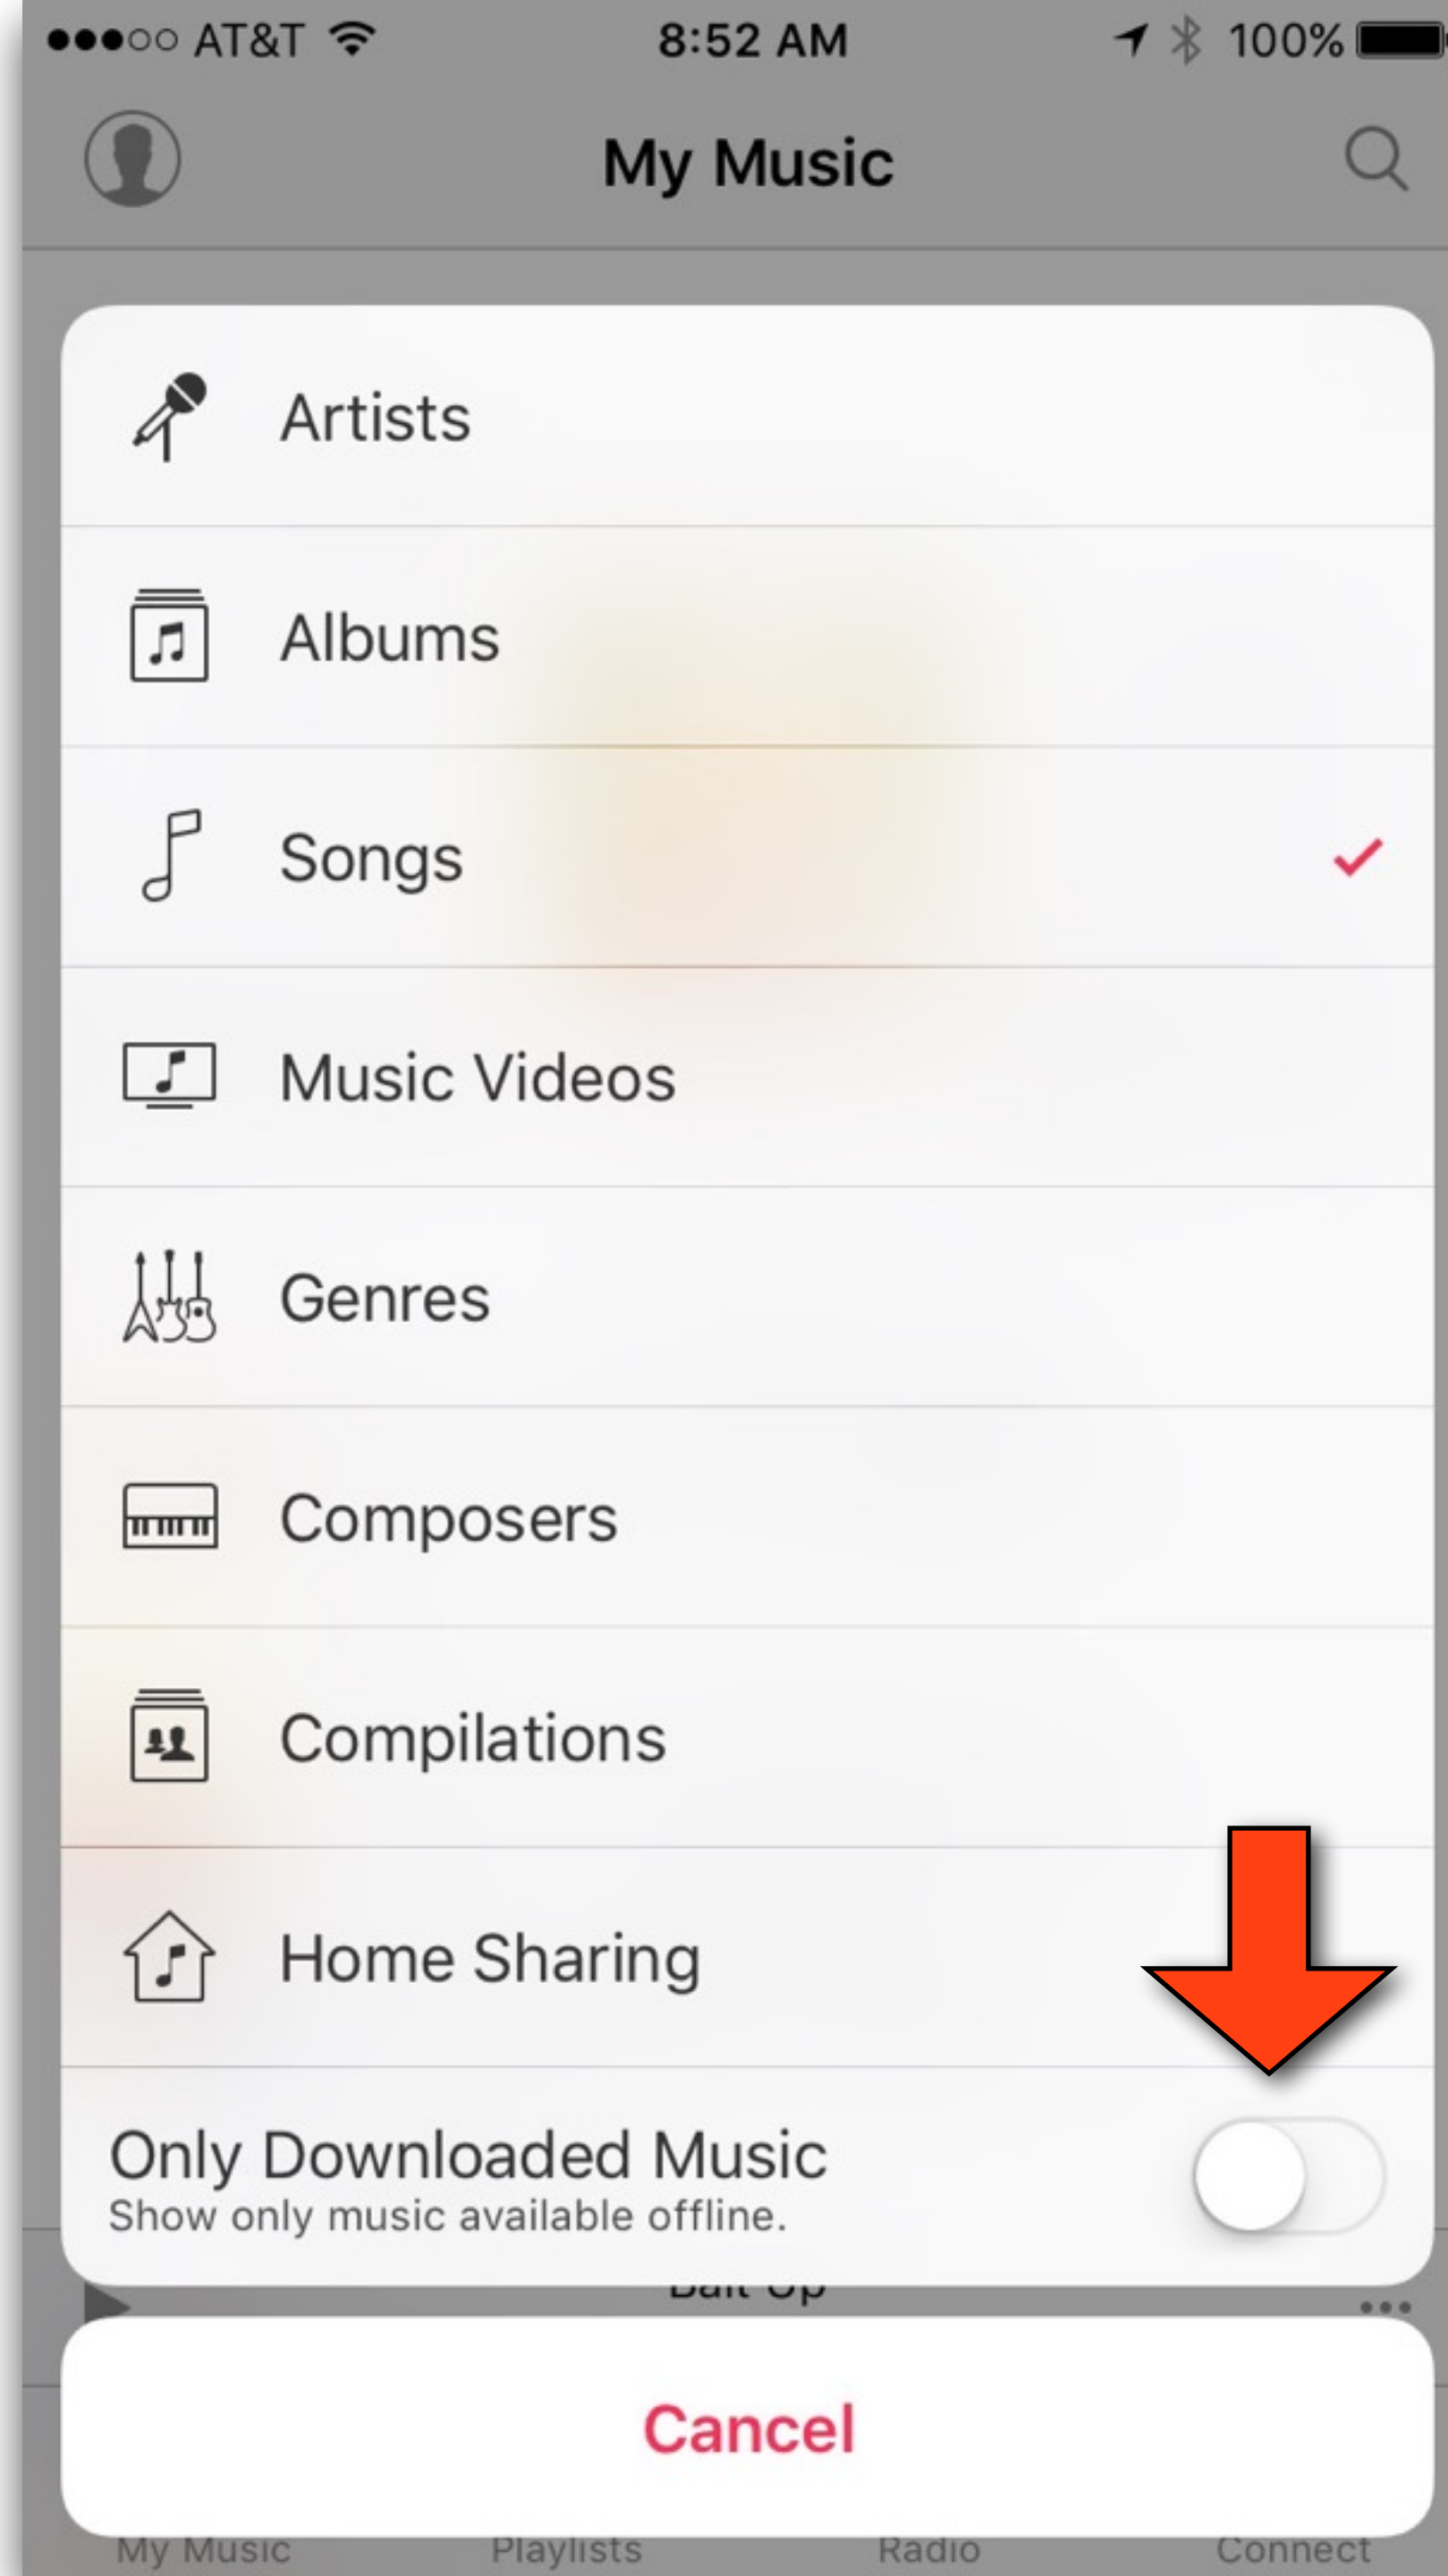

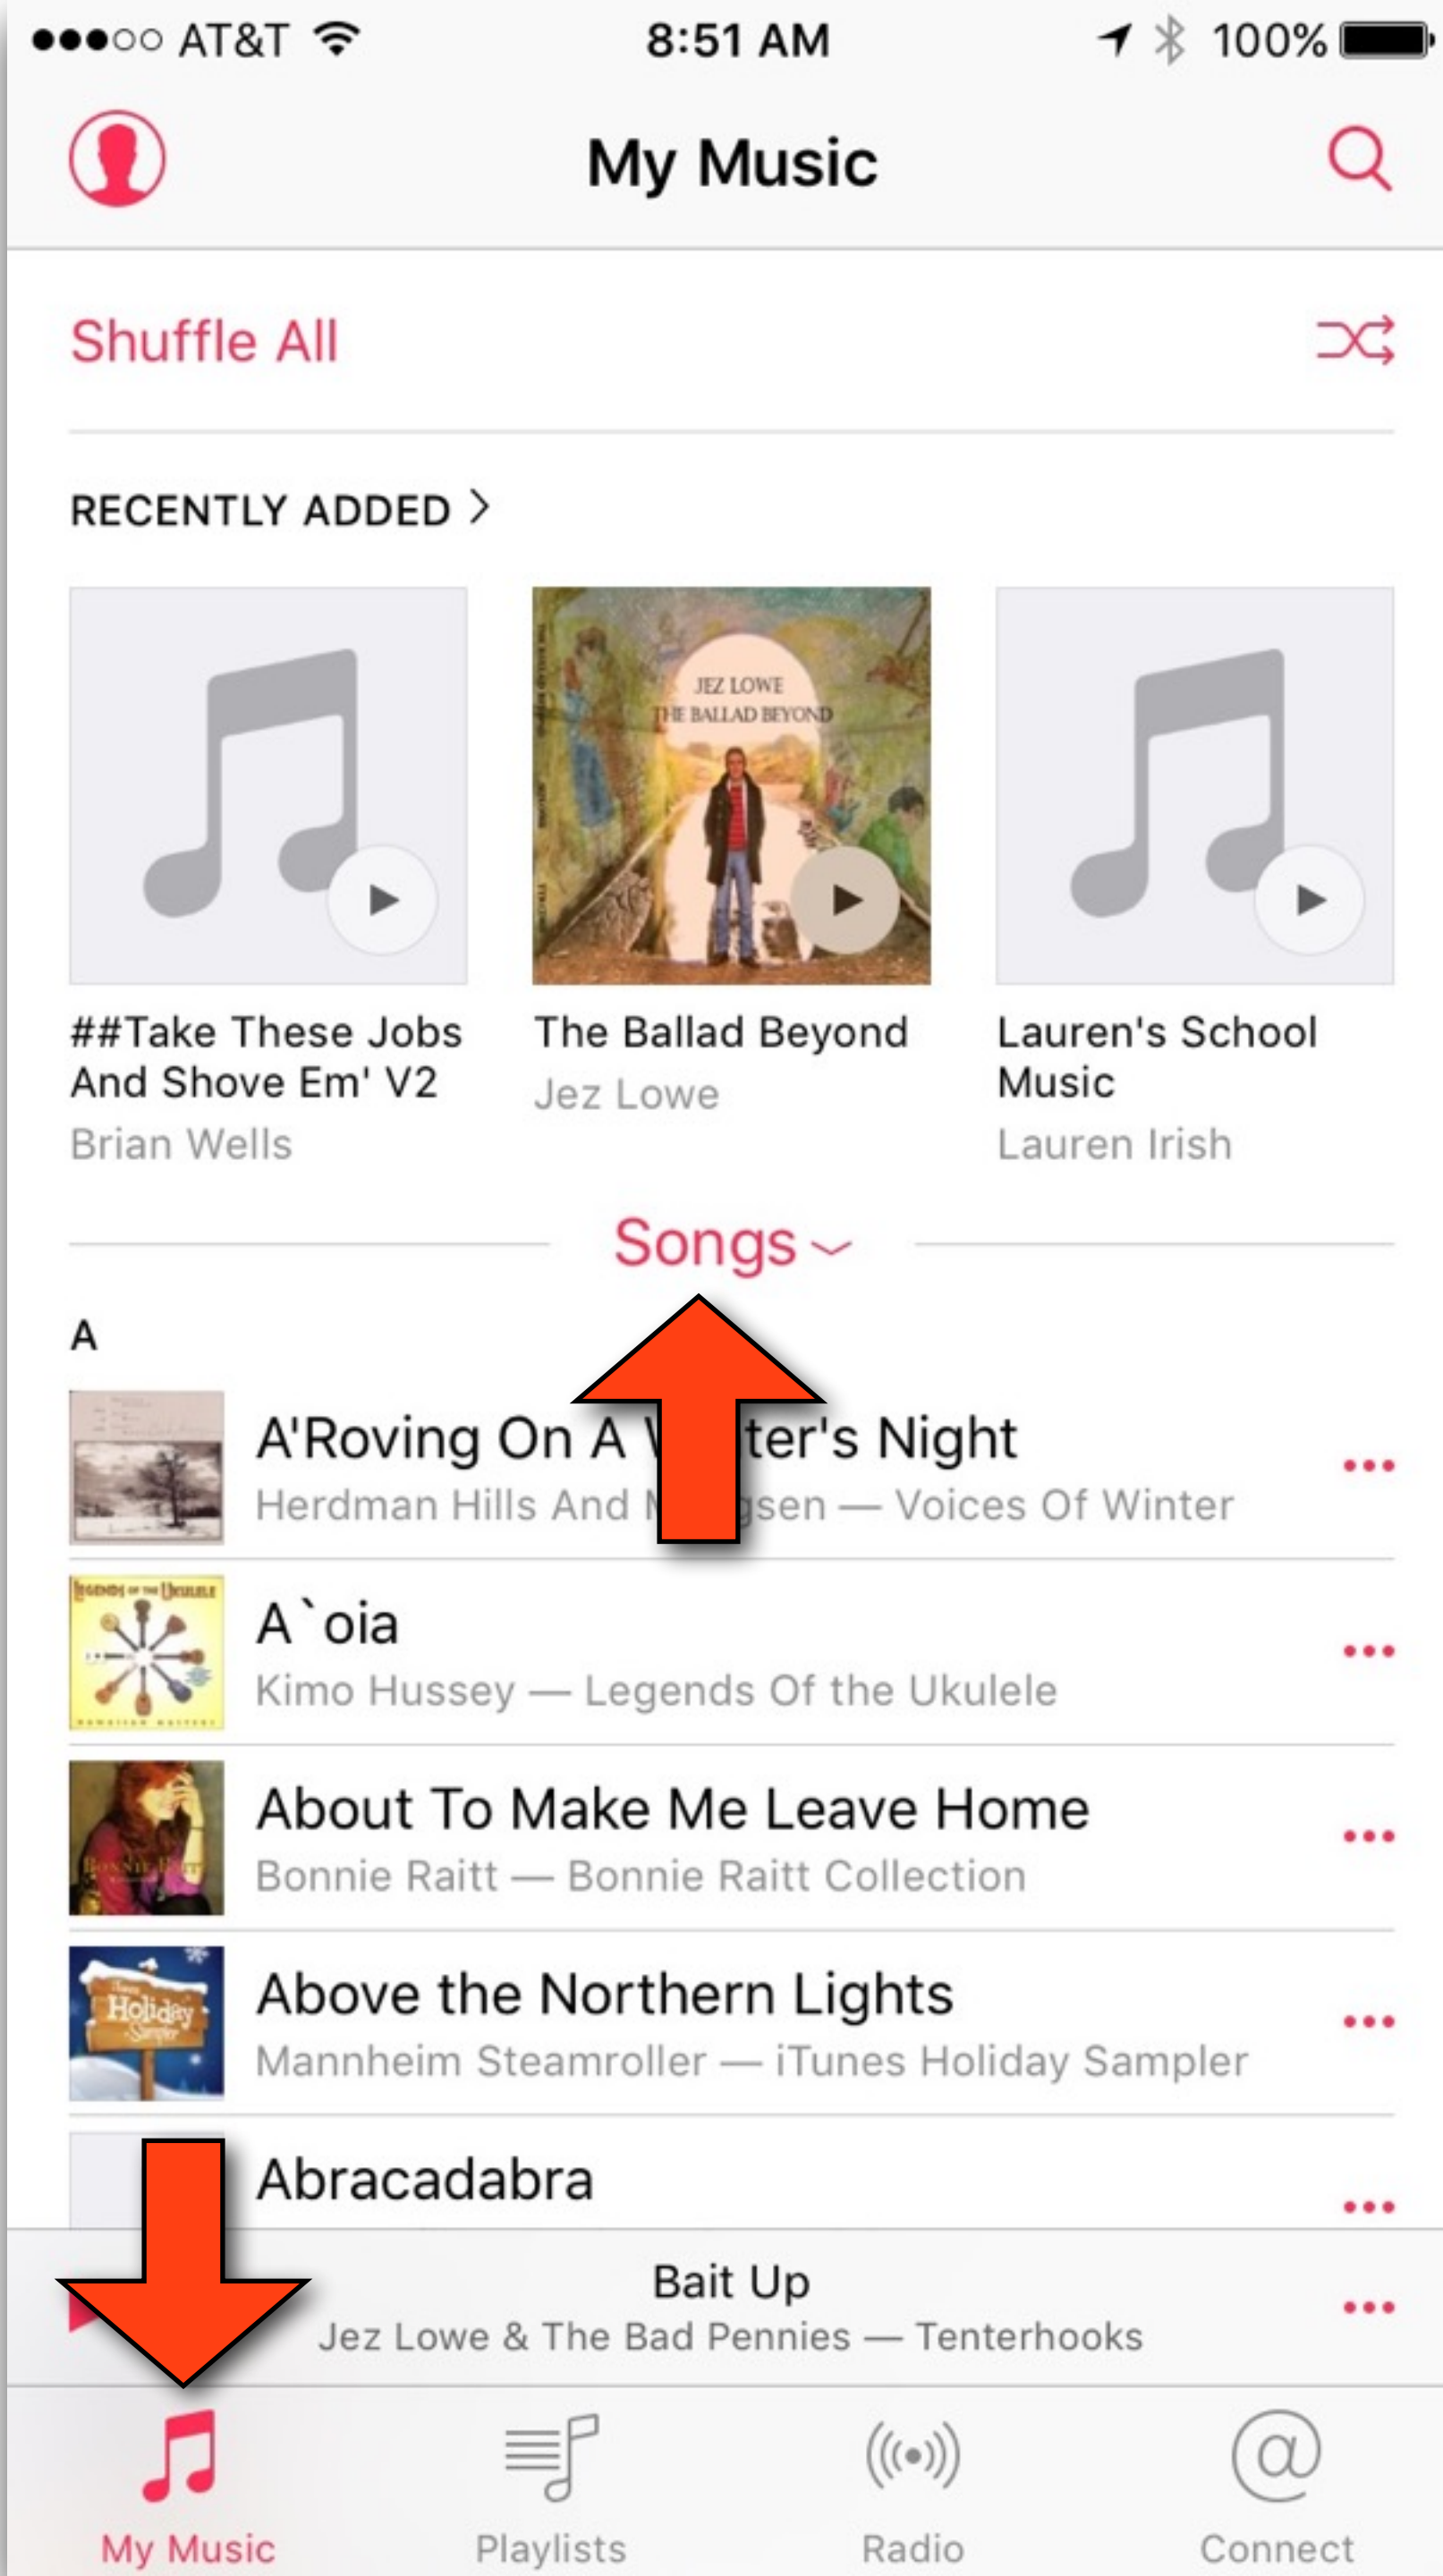

- I have iTunes Match which puts my entire music collection of around 8600 songs in the cloud. This allows me to play any song from any of my Apple devices as long as they are on WiFi.
- However, if I want to listen to music offline (in the car or walking) when I don't have WiFi access, I have to download the songs to my device beforehand.
- So recently I needed to determine which songs were loaded on my iPhone, so I could tell which songs would be available to play in my car. It wasn't obvious how to do this.

Local vs Cloud Music iPhone/iPad

- Launch the Music app on your phone
- Tap on the My Music tab.
- Select the “view type” dropdown (by default, it reads "Albums") from the middle of the screen.
- Switch “Show Music Available Offline” to “on” at the bottom of the pop-up.
- To see all music (offline and online) reverse this procedure or tap “Show all music”

Amazon Echo

Amazon Echo

- Amazon Echo is a hands-free speaker you control with your voice.
- Echo connects to the Alexa Voice Service to play music, provide information, news, sports scores, weather, and more (think Siri).
- Echo has seven microphones and it can hear you from across the room—even while music is playing.
- Echo is always listening. When you want to use Echo, just say the wake word "Alexa" and your request.

Amazon Echo

- Echo provides hands-free voice control for Amazon Music, Spotify, Pandora, iHeartRadio, and TuneIn.
- Since it is also a Bluetooth speaker, you can stream any other music services (like iTunes) from your iPhone or Mac
- It provides local search from Yelp, movie showtimes, Google Calendar, Audible audiobooks, and it can read your Kindle books.
- It has a todo list and a shopping list

Amazon Echo

- It works with the iPhone and iPad thru the Amazon Alexa app.
- Echo also has access to skills. These are 3rd-party apps that add functionality. Examples of skills include the ability to answer general questions, set an alarm, order a pizza from Dominoes, get an Uber, etc...
- I enabled a Fitbit skill. “Alexa, ask Fitbit how I’m doing today” This returns how many steps and active minutes I’ve done.
- When you first turn the Echo on, it actually talks you thru the set up process. I found it extremely easy to get working.
- Echo also works with home automation devices such as lights, switches, and thermostats

Amazon Echo Commands

- Play WHYY (any US radio station)
- Put eggs on my shopping list
- Play James Taylor on Pandora
- What time is it?
- What is the weather today?
- What will the weather be like in Chicago Monday?
- What's on my calendar today?
- What's my next event?
- Add Apple Users group to my calendar at 9:30 April 25th
- Set a repeating alarm for Monday's at 8
- Set timer for 20 minutes
- Close the garage door
- Turn off the living room lights
- What's new?

Amazon Echo Commands

- Pair Bluetooth
- Stop, Play, Pause,...
- Mute, Louder, Softer, Volume 5
- Check Traffic
- How many calories in an orange?
- Who wrote Game of Thrones?
- Wikipedia “Newark”
- Check my sports scores
- What bakeries are close by?
- Read my kindle book
- Re-order AAA Batteries
- What movies are playing?

Amazon Echo

- This is one of the coolest devices I've seen in a while
- It's like a science fiction movie where you see people interacting with their house or the computer on StarTrek
- It sells for \$179 from Amazon, Best Buy, Staples.
- You can also get the Amazon Dot for \$89 with smaller speakers but you can hook it up to other speakers thru an Aux port
- The latest option is the Amazon Tap for \$129. This is like the Echo, but is not "Always On". You have to "Tap" the device to enable Alexa

Numbers

Moving from Windows

- I used primarily Windows 7 while I was working. Just before I retired, I got my first Mac and since have been bipolar
- Since my Windows machine will not upgrade to Windows 10, I think my Windows days are over and anticipating this, I am in the process of moving everything to the Mac/iPad.
- To date, this has been relatively easy, but since I was a very experienced Excel user, I've been reluctant to move to Numbers
- This month I decided to “bite the bullet”

Excel vs. Numbers

- Excel is the ubiquitous spreadsheet program that is standard for almost every organization out there. It's the 500 lb gorilla of spreadsheets
- Without a doubt, it is a workhorse and can do anything you could ask of a spreadsheet.
- Numbers while not as sophisticated (or complicated), will do everything that most home users would want
- Numbers is also more design oriented and you can put multiple tables on one worksheet (unlike Excel). It's much easier to mix graphics, graphs, and tables for reports.

Excel vs. Numbers

- Excel is also an expensive program (>\$100), while numbers is free when you buy a Mac.
- If you are a CPA or statistician or if you use pivot tables, slices, or other database like functions, then Excel is for you
- For most other users, I'd suggest not paying for Excel (Or office) and at least try Numbers (or iWorks)
- By the way, MS Office files are read natively by iOS and OS X so you can read these files if they are sent to you, without any additional software.

Excel vs. Numbers

- iWorks will also import and export Office formatted files
- I actually prefer Keynote and Pages to Powerpoint and Word
- To learn Numbers I bought the book “iWorks - The Missing Manual” for around \$18 in Kindle format
- I find the Missing Manual books to be excellent but they are very extensive and might be too much for a casual user. There are other simpler books out there if you wish

O'REILLY®

"The Missing Manual series is simply the most intelligent and usable series of guidebooks..."
—KEVIN KELLY, CO-FOUNDER OF WIRED

iWork

Baby's First Year

A Numbers Spreadsheet

November 2, 2014 at 6:26 am

Birth weight	7.9 lbs
Birth length	18.6 in
Birth head circ.	14.2 in
Location	Anytown, State

Month	Height (in)	Weight (lbs)	Head Circumference (in)	Temp. (F)	Notes
1	19.20	8.50	14.20	98.5	
2	20.10	9.30	14.99	98.5	
3	21.45	10.50	15.78	98.5	Dr. Jones says he's doing well.
4	22.55	11.90	16.40	98.6	
5	23.40	12.50	16.85	98.6	
6					
7					

Numbers has a blank canvas as the background and unlike excel, it can have multiple independent tables on a sheet.

Numbers

- I found Numbers the most difficult to learn of the iWorks programs.
- It might be because I had used Excel so much that it was second nature.
- I had to retrain myself in the way that Numbers worked
- I did this by reading the book and trying things out in Numbers
- At the end of the day, I think I now prefer Numbers to Excel for the type of spreadsheets I now use.

Numbers

- It was very easy to import all my Excel files to Numbers. Just move the files to my Mac and when I opened the files, they opened automatically in Numbers.
- As you import, you'll get a notice if anything doesn't translate properly. In my case, it was mostly fonts and pivot tables.
- Pivot tables were translated to regular tables and Numbers substituted a similar Mac font.
- All functions in Excel come over perfectly to Numbers. In fact while learning about certain Numbers functions, I even used Excel articles on line.

Numbers

- Numbers is very consistent with Keynote and Pages, so skills translate well between the programs
- Here is one of the spreadsheets that I imported and translated to Excel.
- I had used Pivot tables for this in Excel. I got the same result using the Countif() and Sumif() functions in Numbers.

Cruise History

Date	Days	Ship	Line	Originating	Ports	Comments
Nov 1991	7	New Amsterdam	Holland America	Tampa	Key West, Grand Cayman, Ocha Rios Jamaica, Cozemel

Numbers

- To create an Numbers spreadsheet, just open Numbers and select File>New
- You then select a template. The templates vary from blank to very extensive templates for managing finances, health, calendars, travel planners, etc...
- These templates are a great place to start or even get ideas and see how they were put together.

Numbers

- This was not intended to make you a Numbers expert, but to give you a flavor of what it can do and how it works
- You can also run Numbers on an iPad or iPhone although the interface is somewhat different
- You can also use iCloud to run Numbers thru a web browser even on a PC
- I will now be glad to help people with Numbers, Pages, or Keynote in a one-on-one session. I'm also very willing to take requests for questions during the monthly meetings

Adobe Flash

Adobe Flash

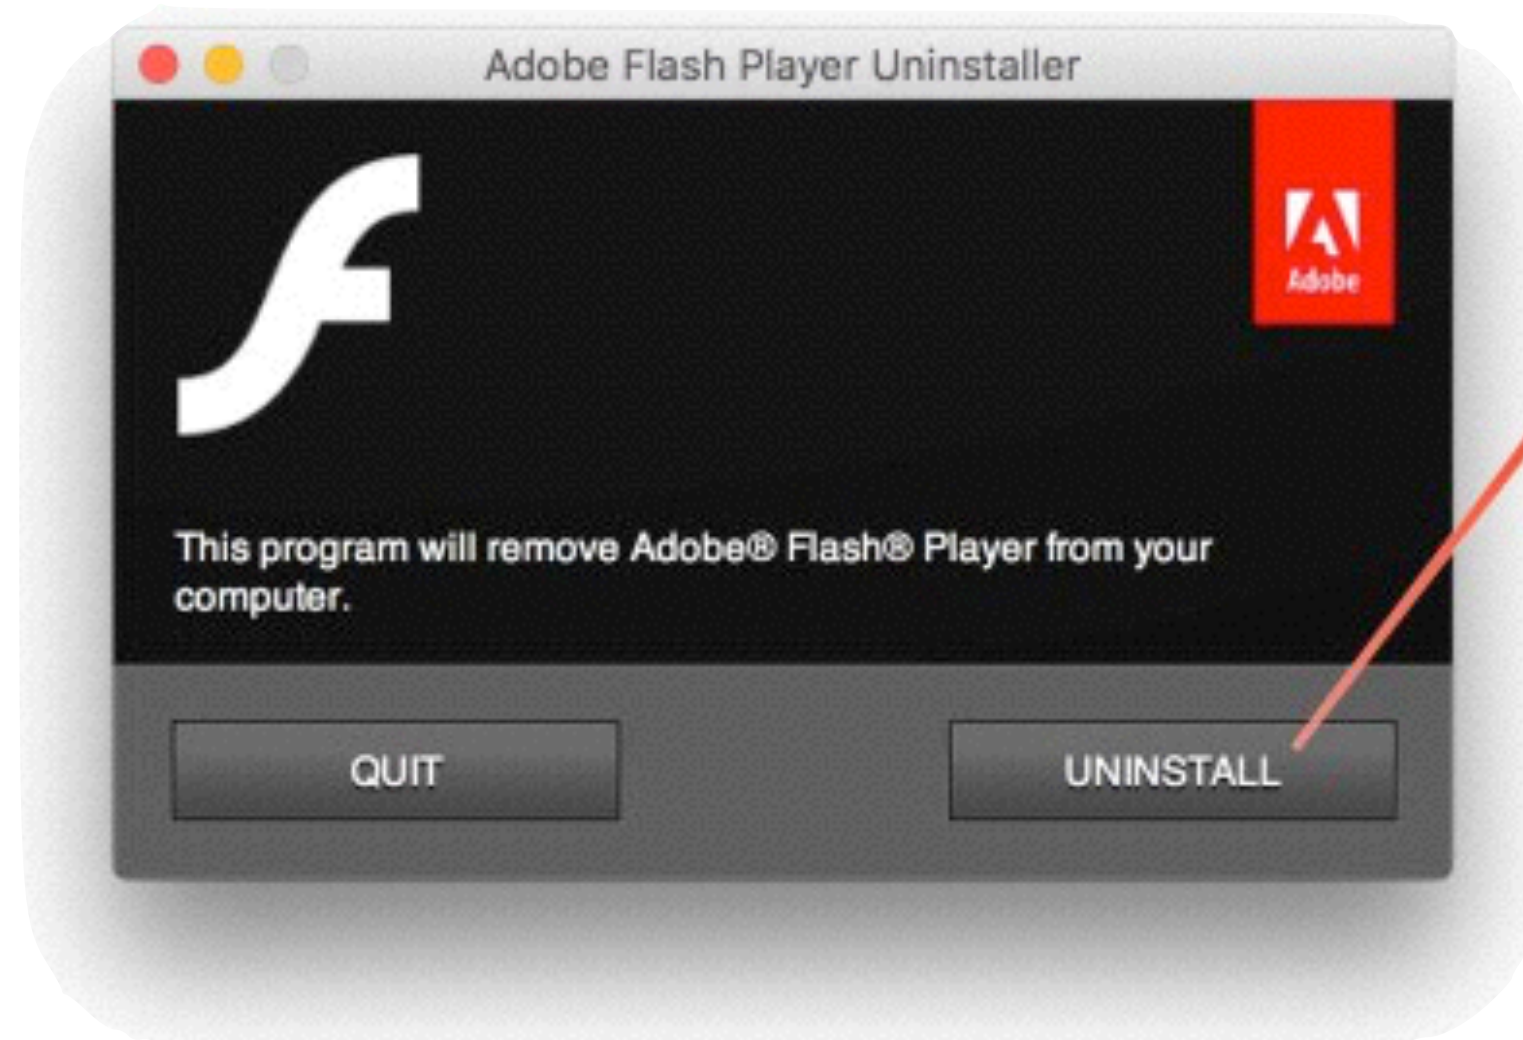

- If you don't need Flash, you're better off without it. It's a major security problem, can cause performance and battery issues
- It is also increasingly irrelevant to the web as more developers switch to HTML5 and other solutions
- If you absolutely need Adobe Flash to access content on the web that you need, at least make sure you've updated to the most recent version. In a recent presentation, I provide information on how to safely update Flash
- If you already have Flash installed on your Mac and you've decided that enough is enough, here's how to remove it once and for all.

Removing Adobe Flash

- Open the Utilities folder in Applications
- Double-click on Adobe Flash Player Install Manager
- Click the Uninstall button

Syncing PDF's in iBooks

- PDFs are incredibly useful.
- Manuals, user guides are usually provided in PDF format
- A lot of programs allow you to export as PDF (iWork, Safari, etc...)
- On a Mac, anything you can print can be printed as a PDF document.
- PDFs can be read universally across virtually any technology

Syncing PDF's in iBooks

- The ability to sync PDF's across devices in iBooks is a new feature that came with iOS 9.3.
- When you first open iBooks in iOS 9.3 or OS X 10.11.4, you'll be asked if you want to use iCloud. Say yes.
- After iBooks syncs (Mine took about 24 hours), you'll have access to any PDF on all your devices.
- You can add PDF's by using the share button in iOS or dragging any PDF into iBooks on OS X.
- You can also sort your PDF's easily in iBooks

iCloud for iBooks

Now you can access your entire library, including PDFs, on any device, any time.

iOS

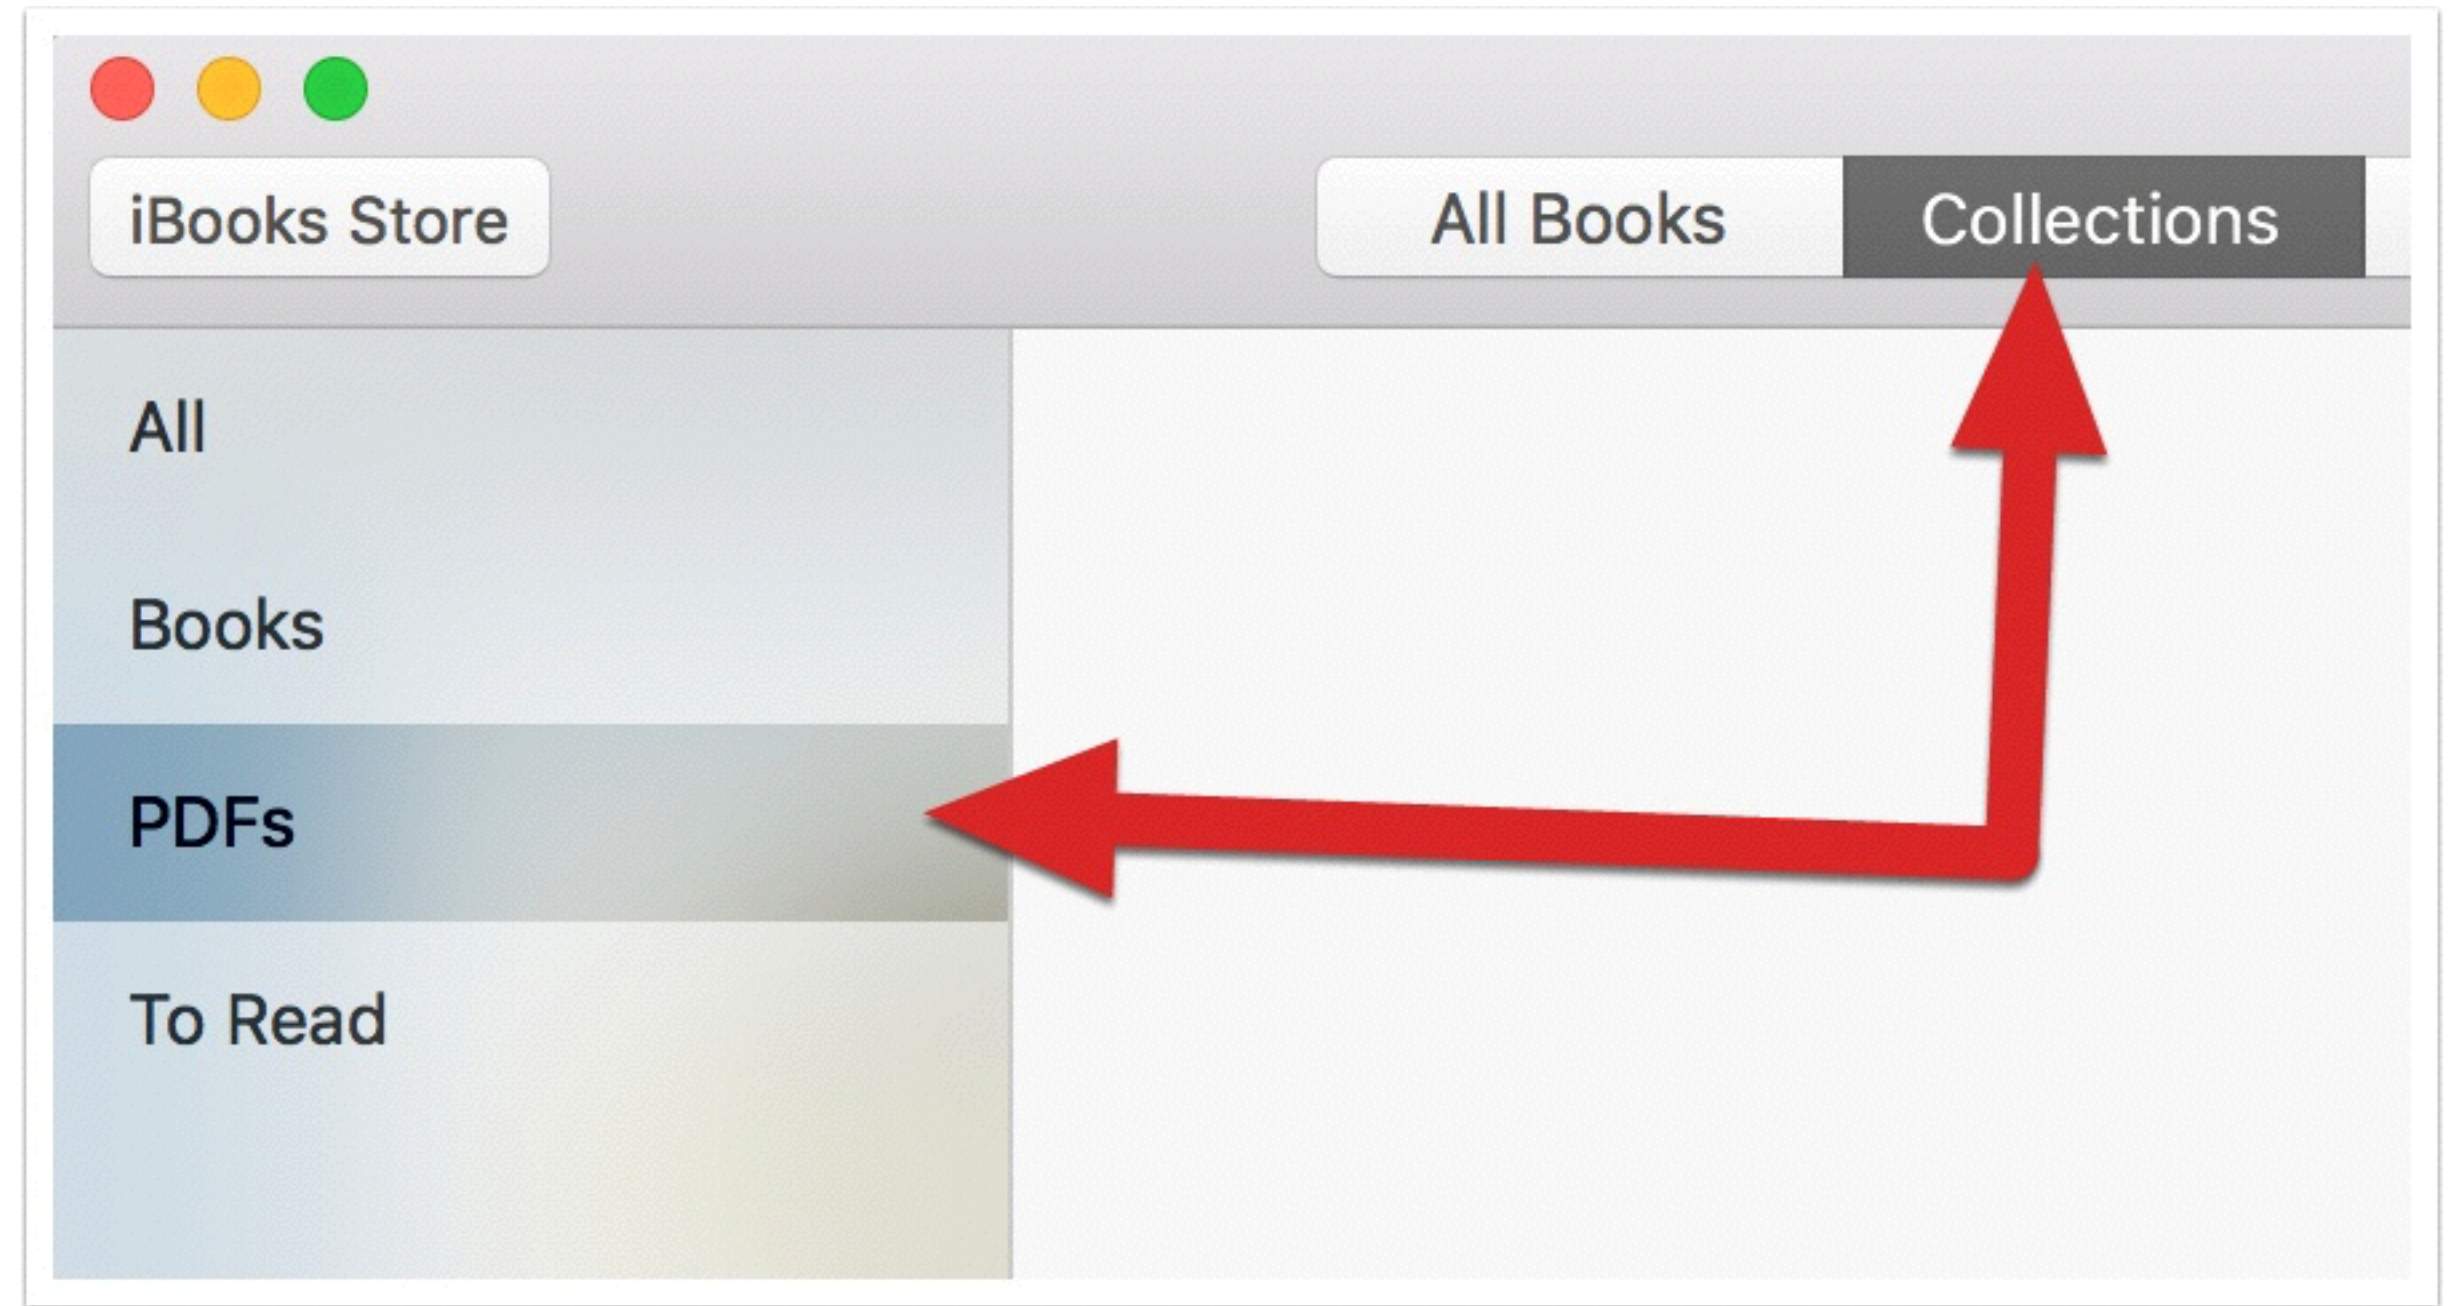

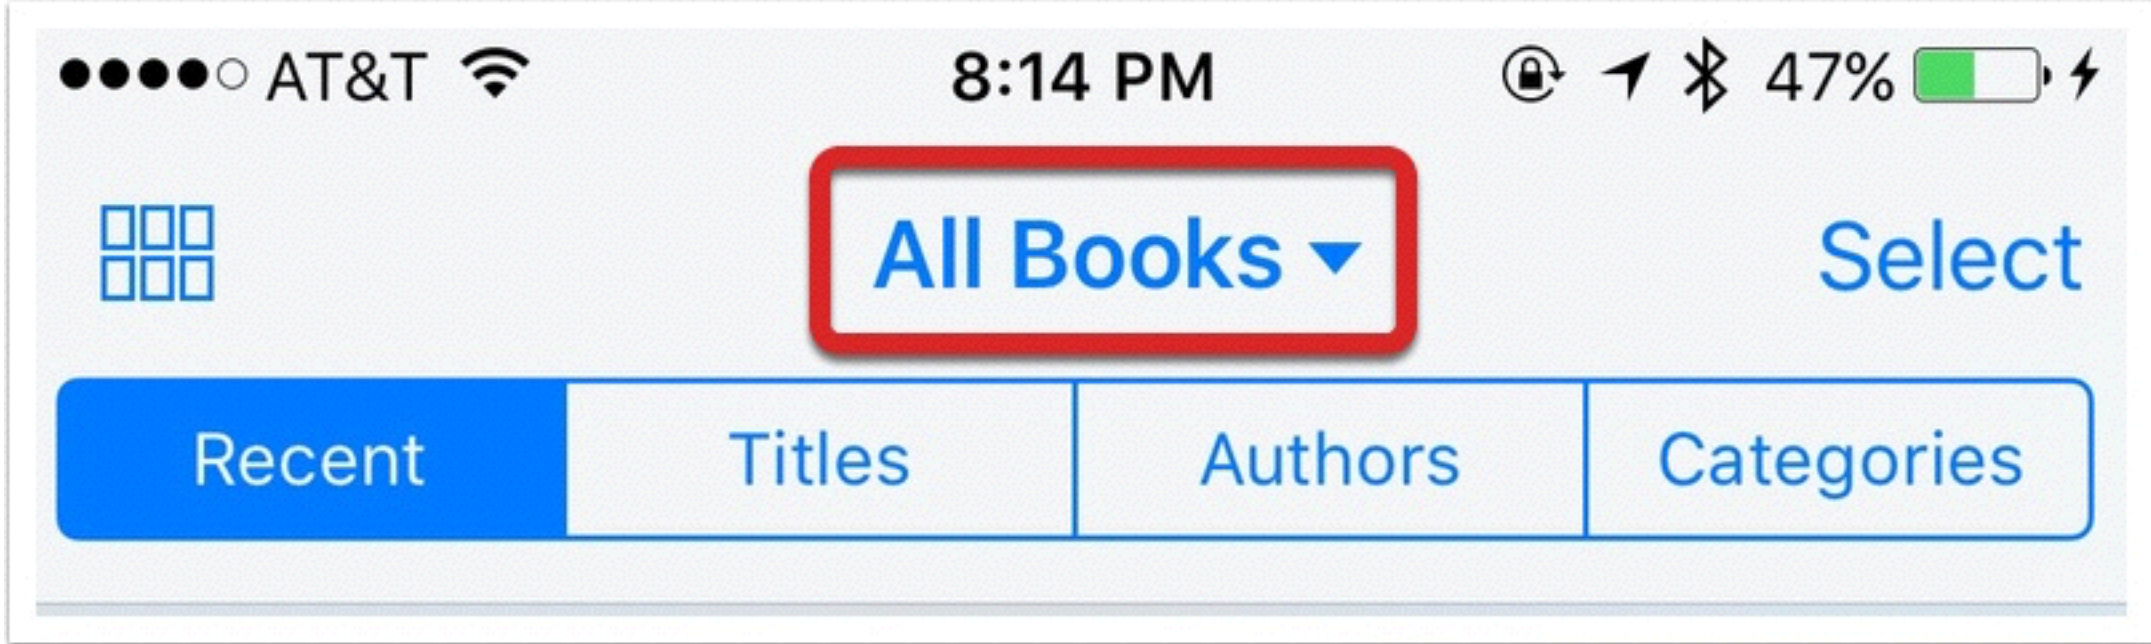

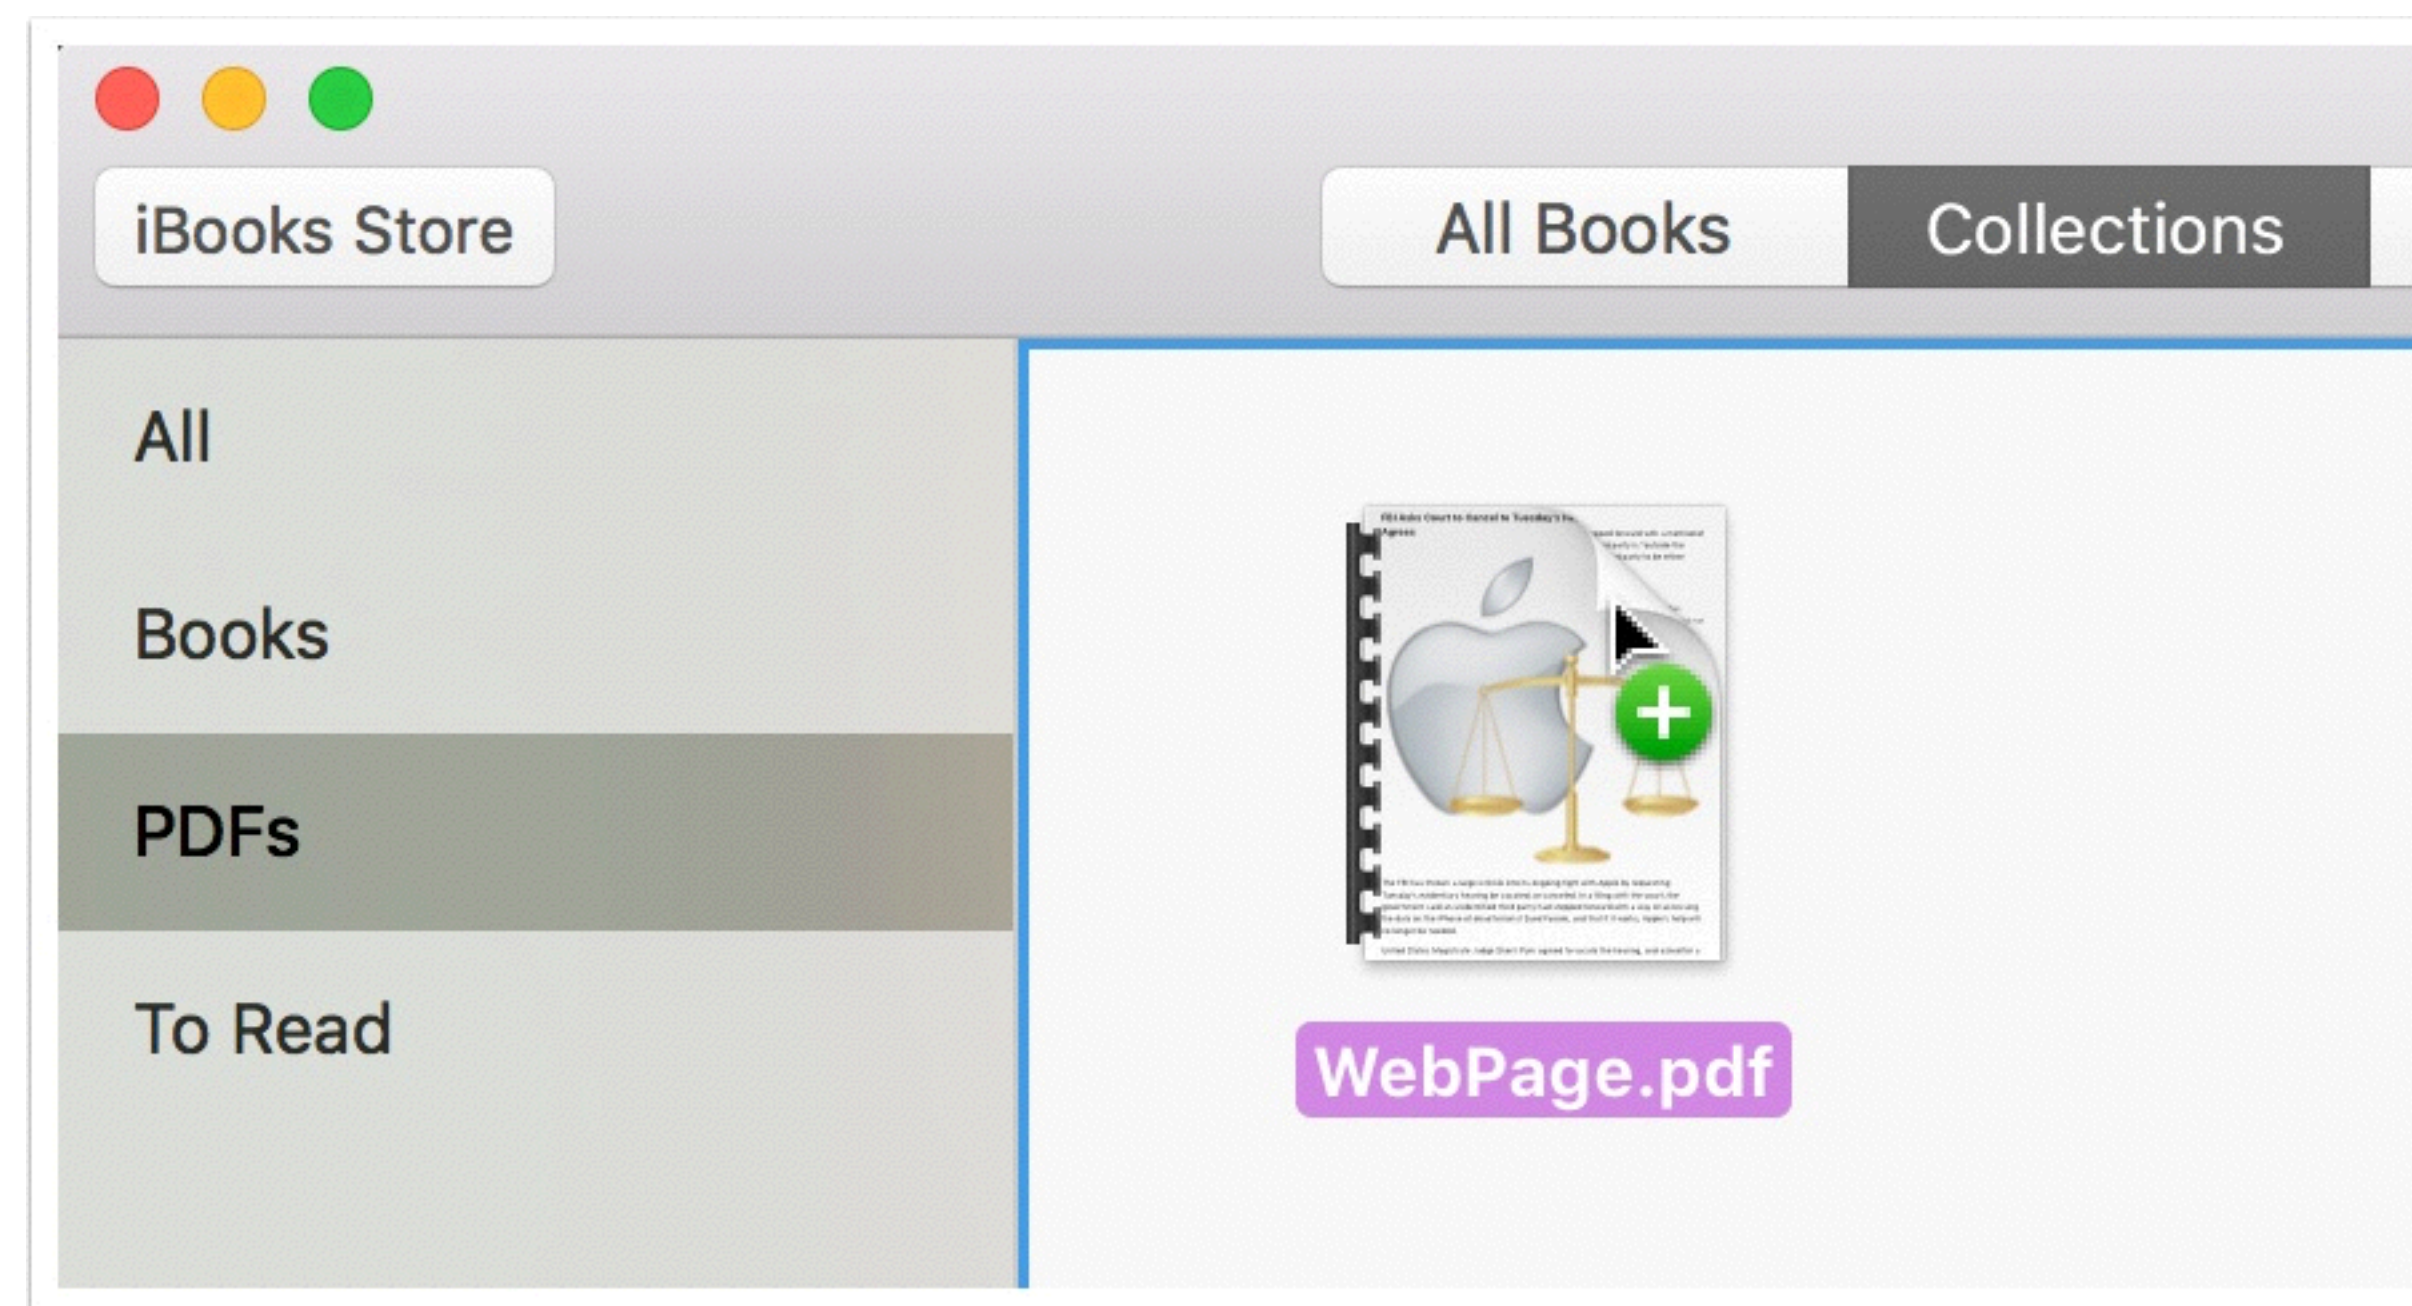

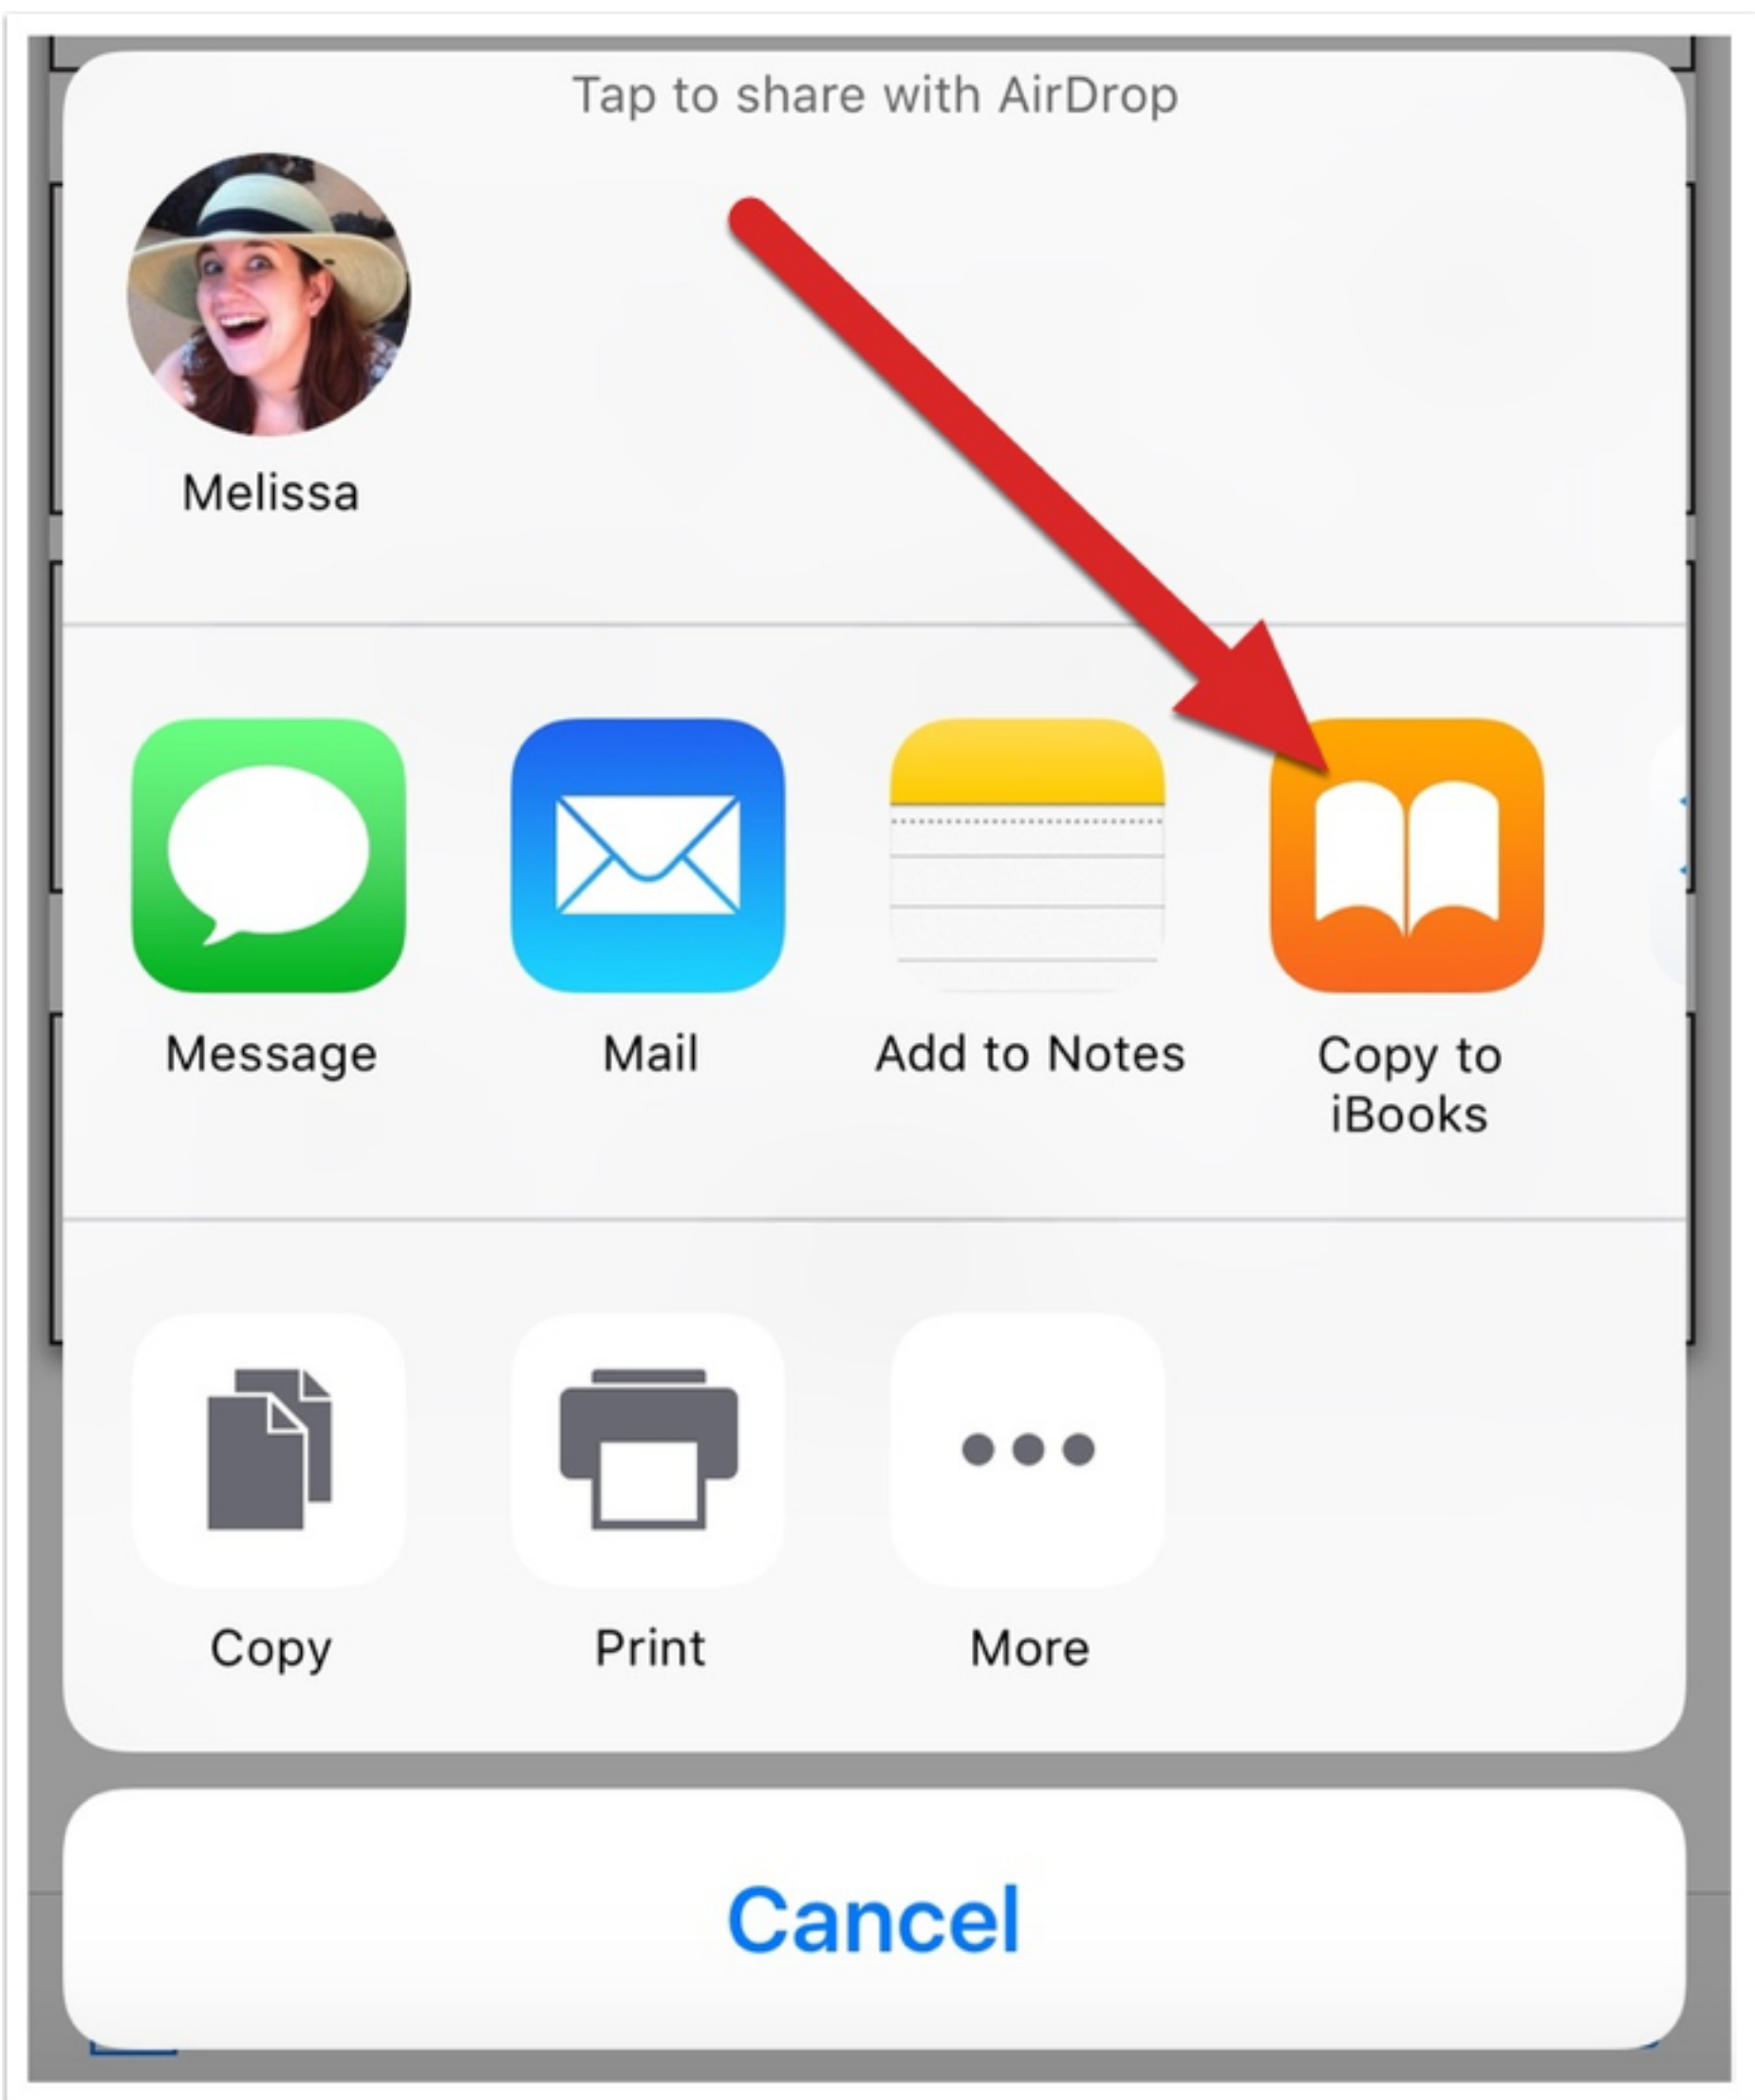

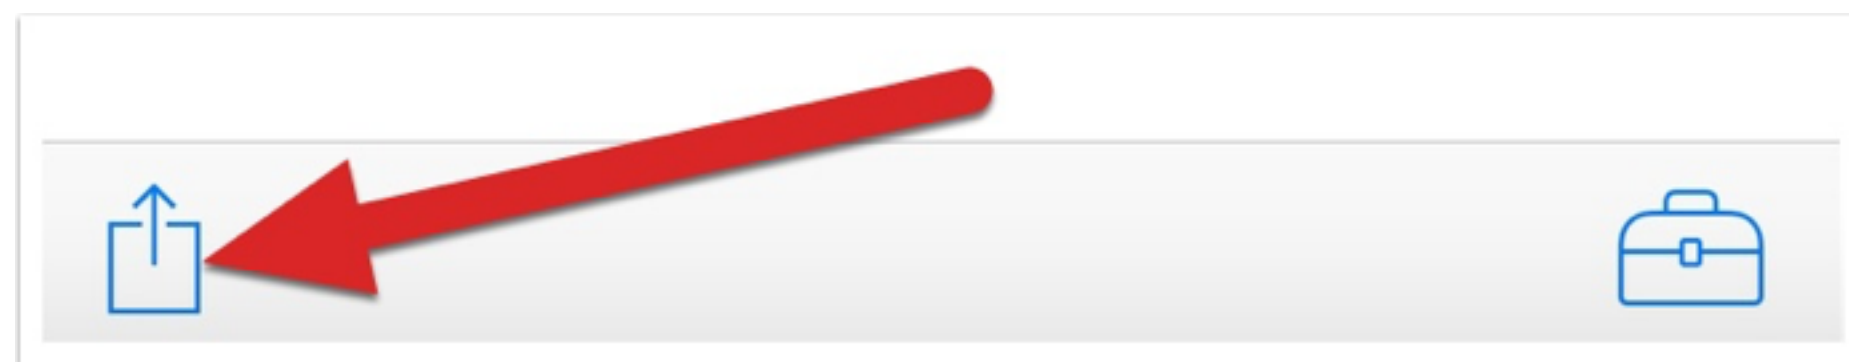

Use iCloud

[Not Now](#)

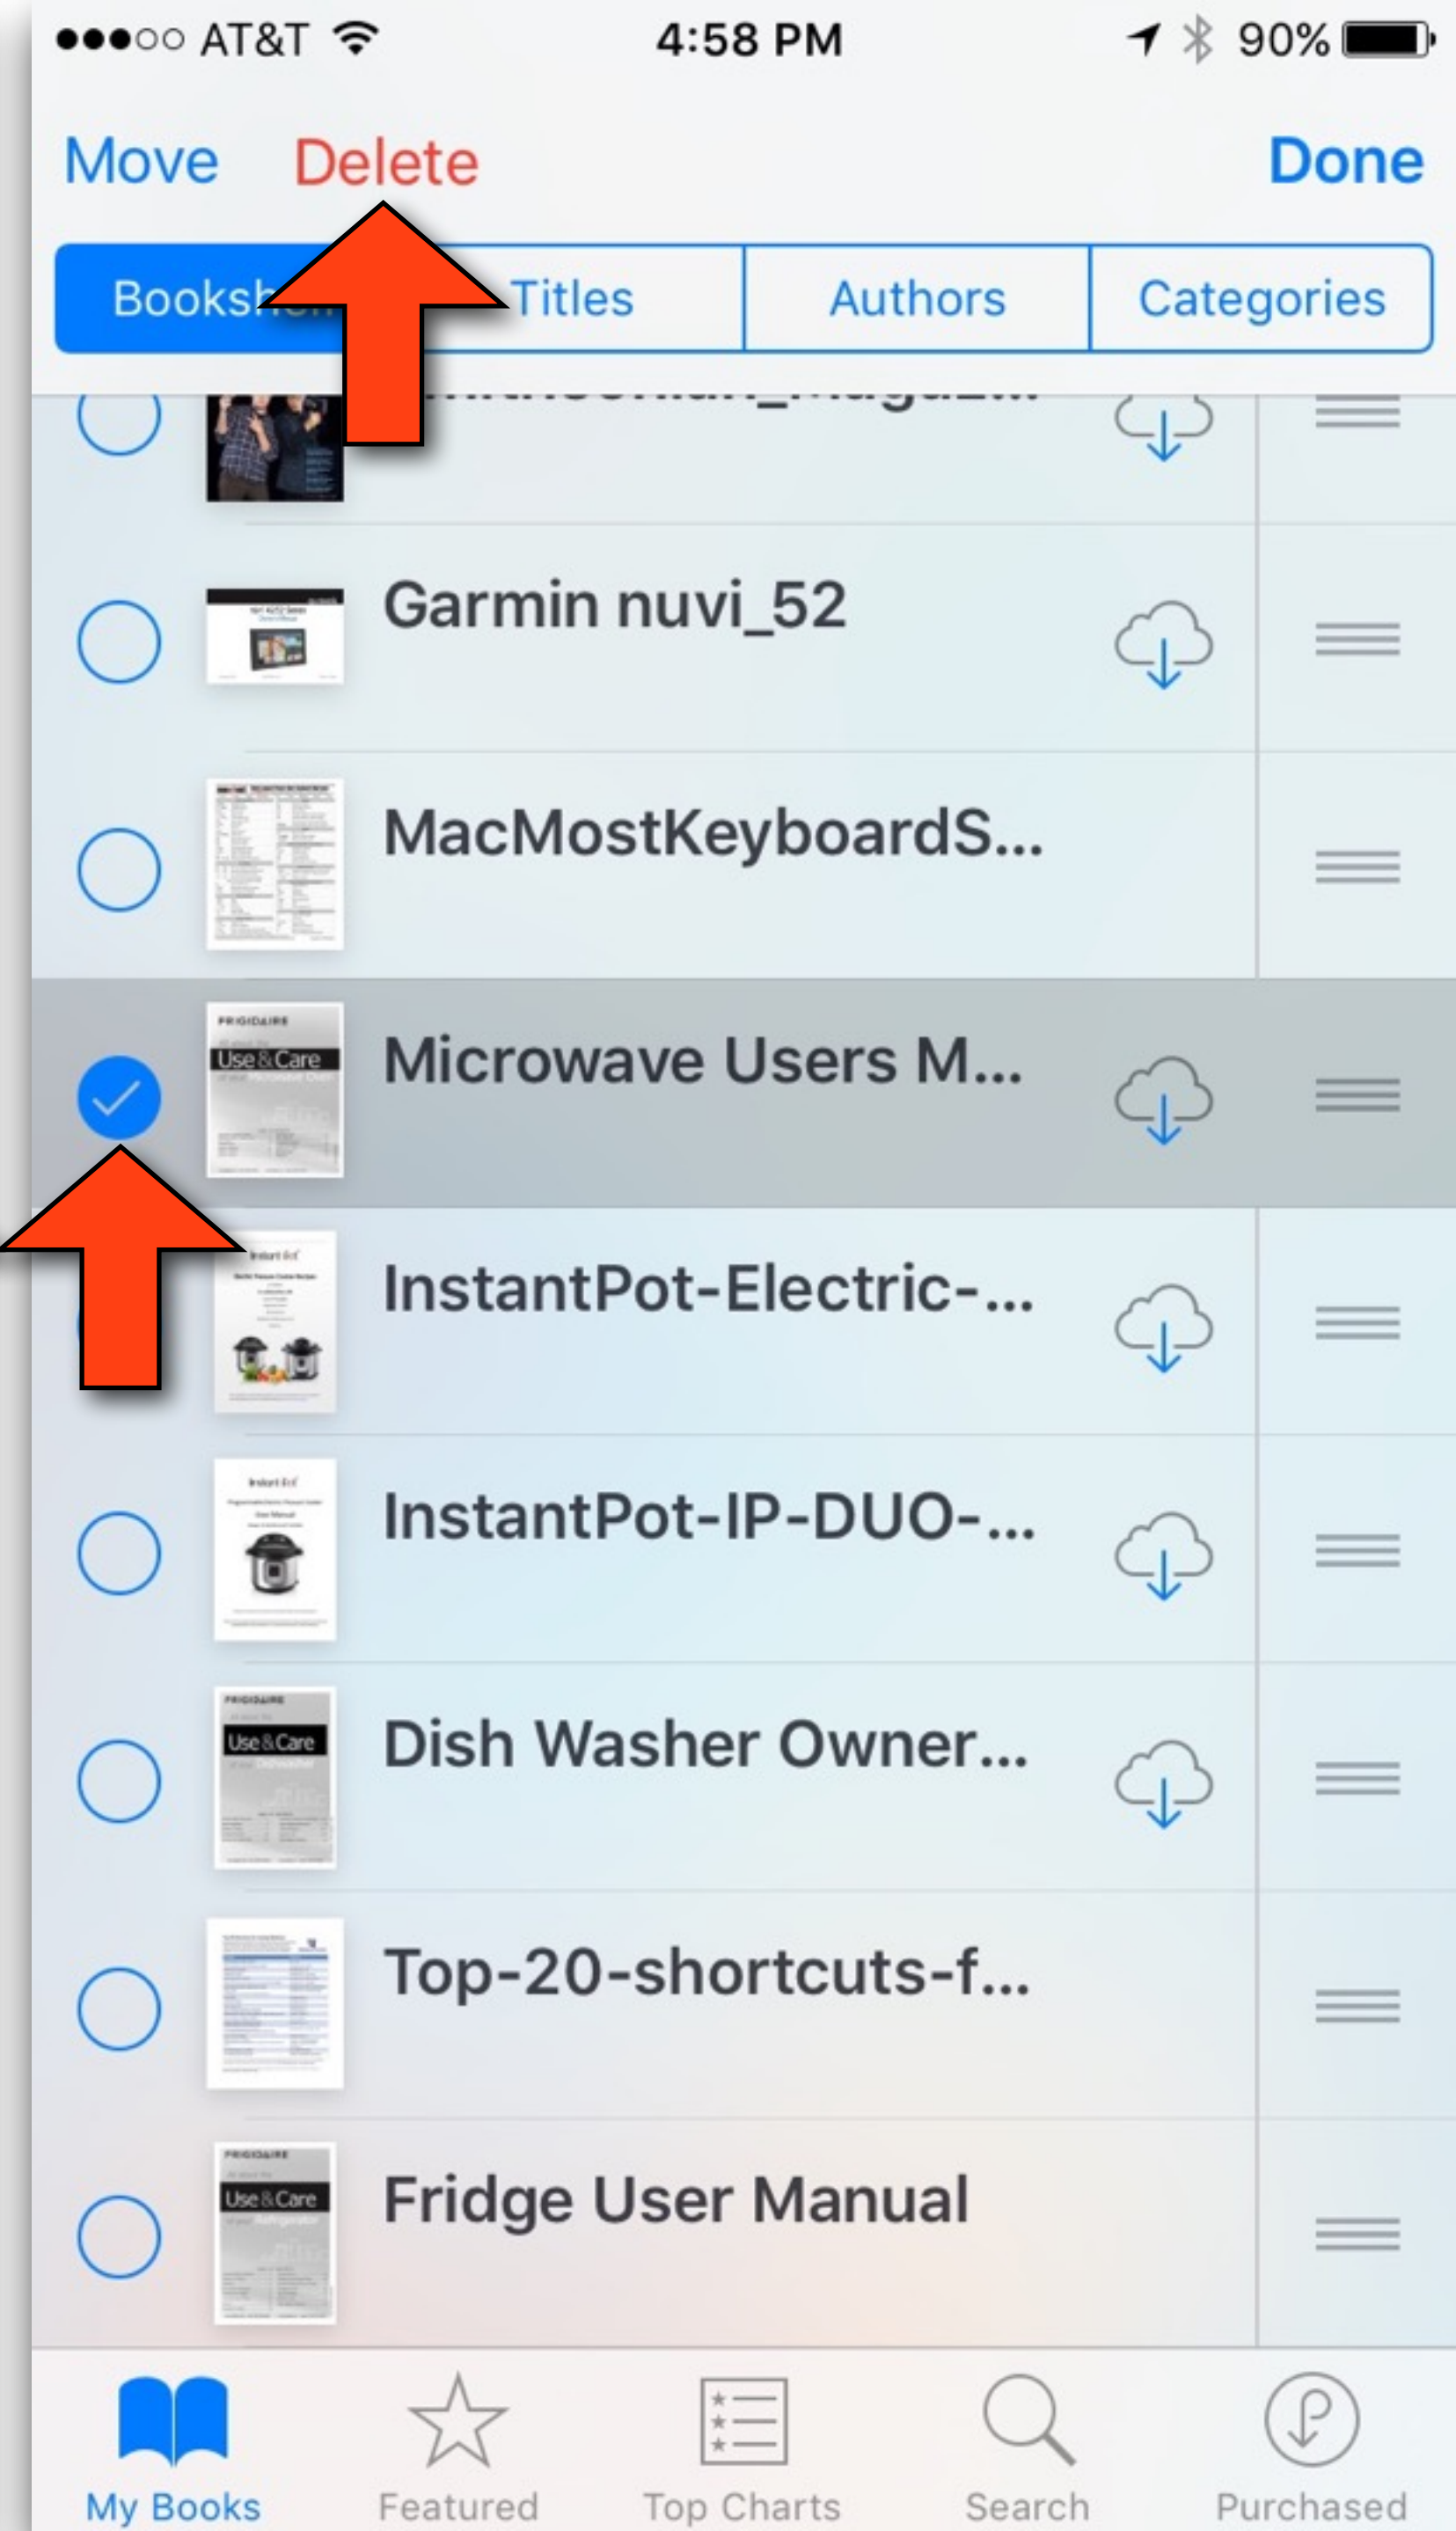

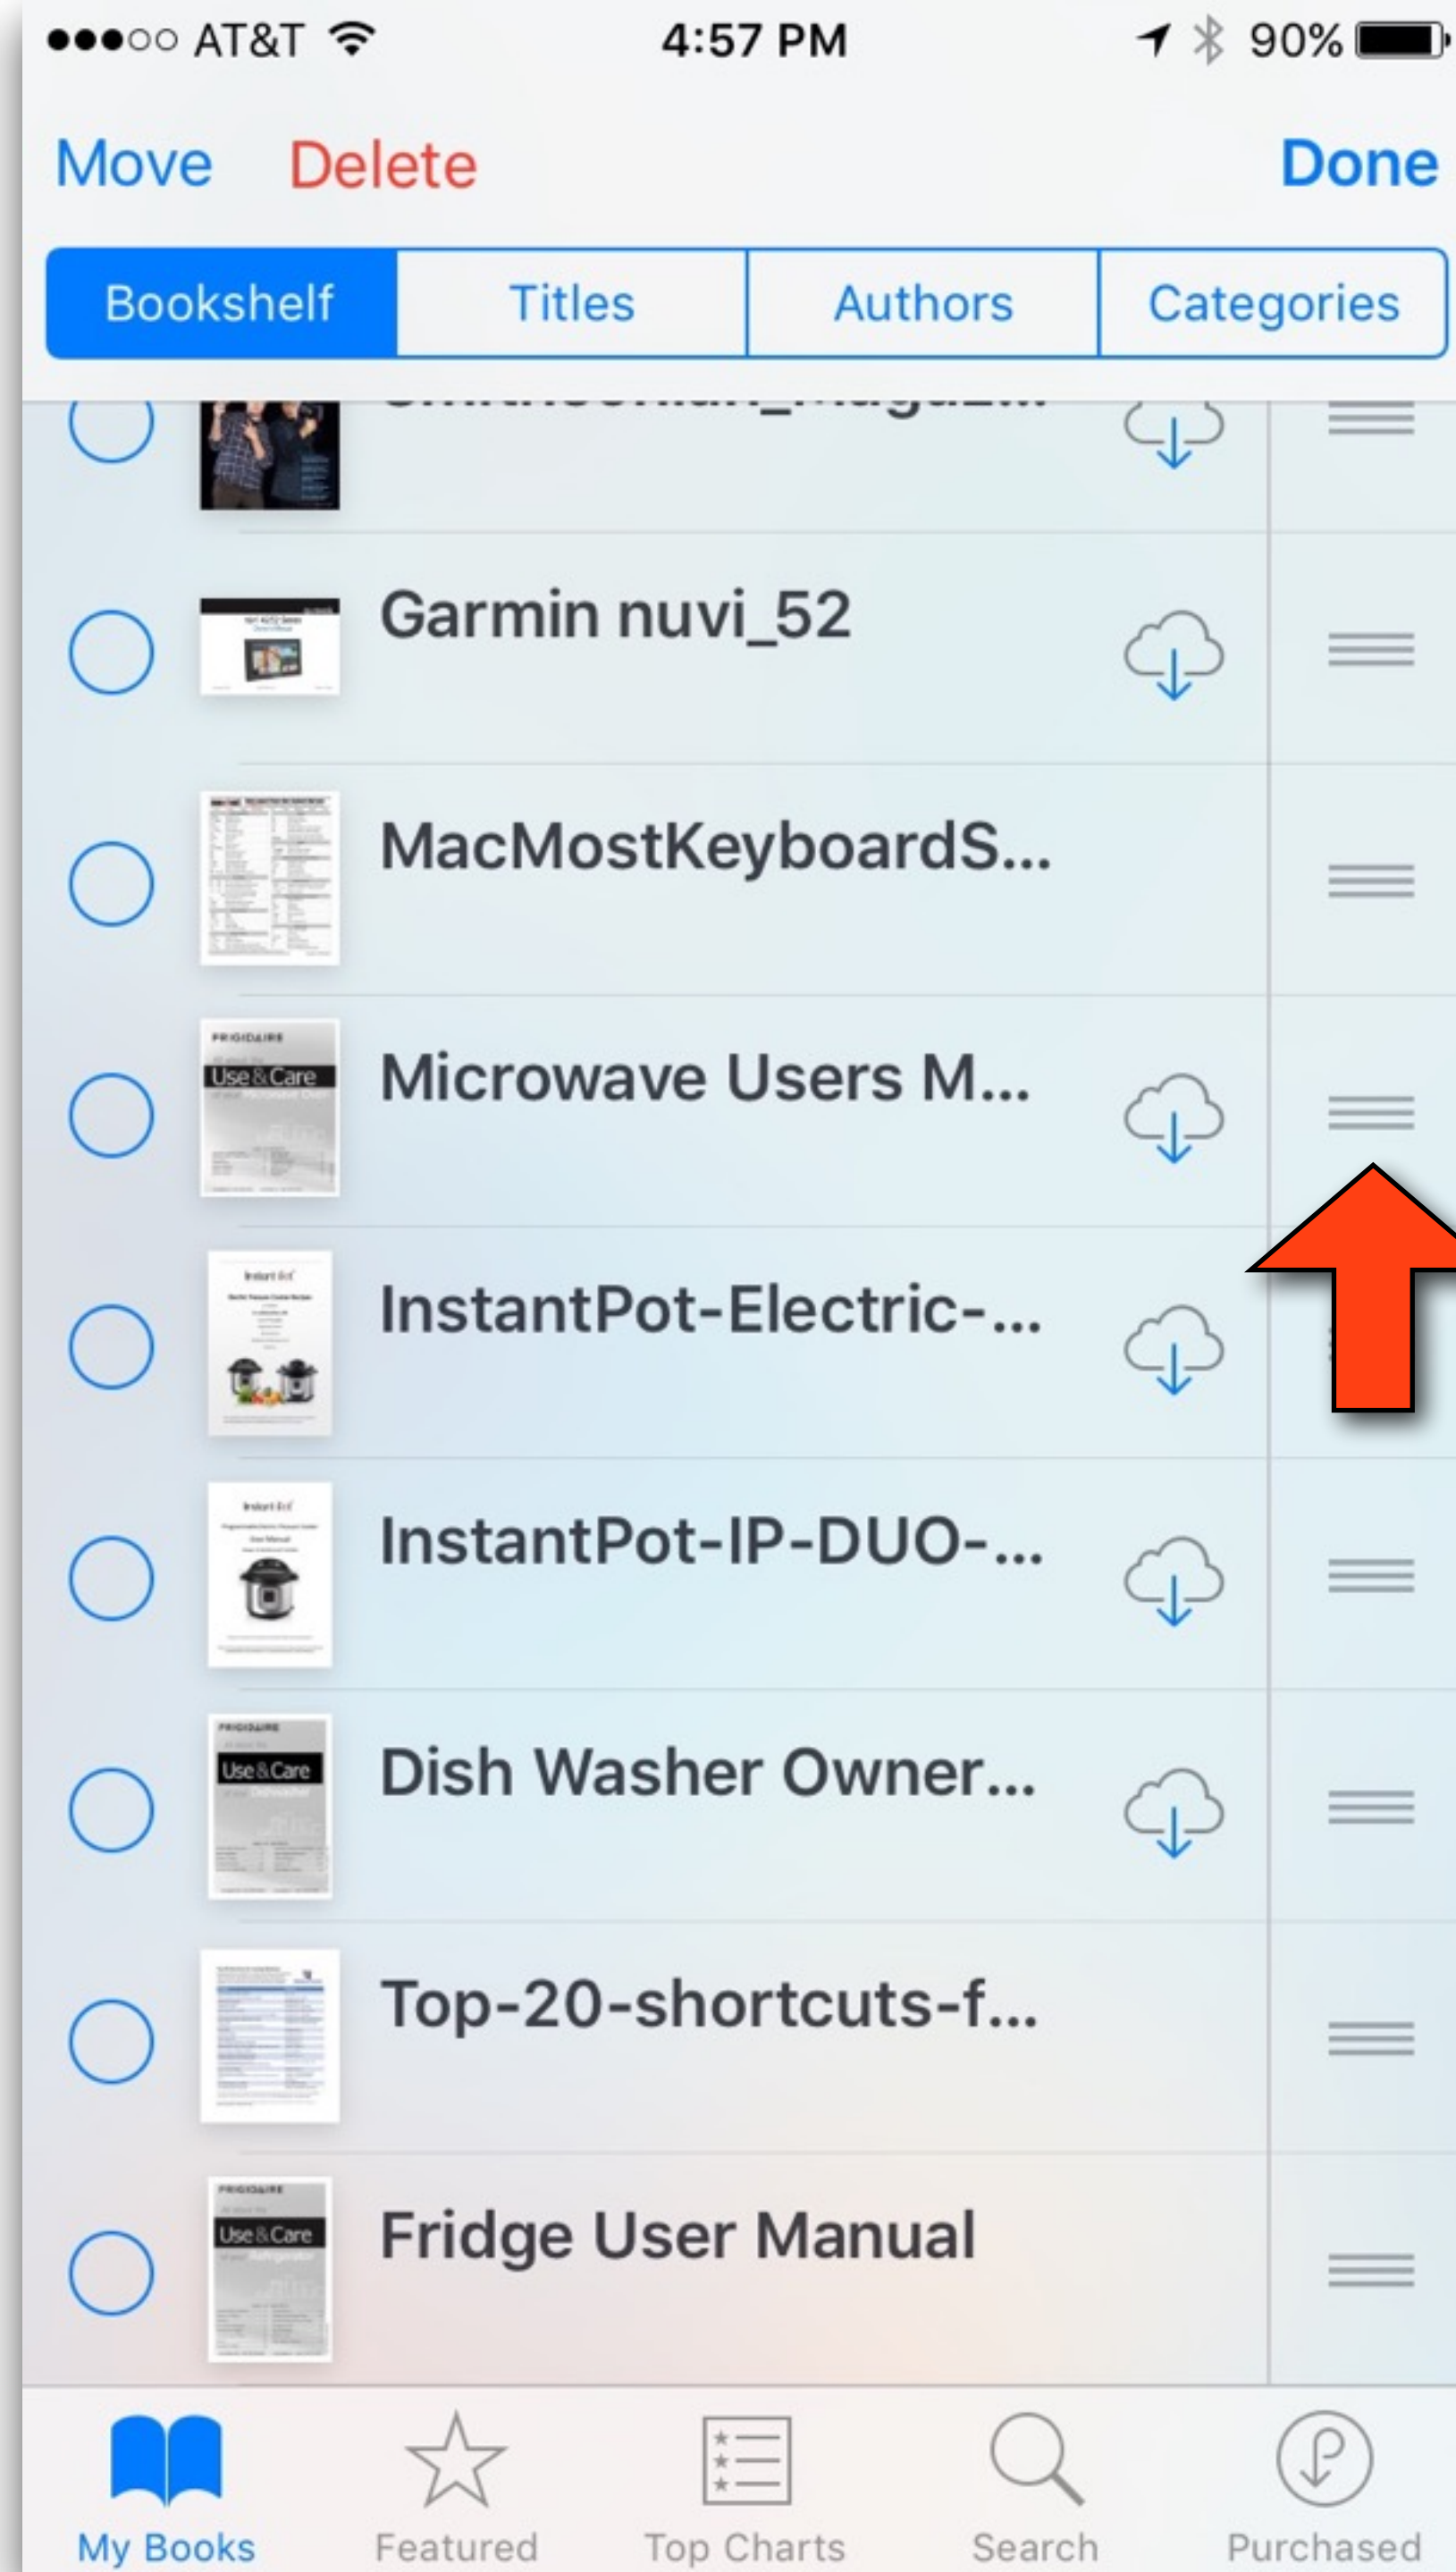

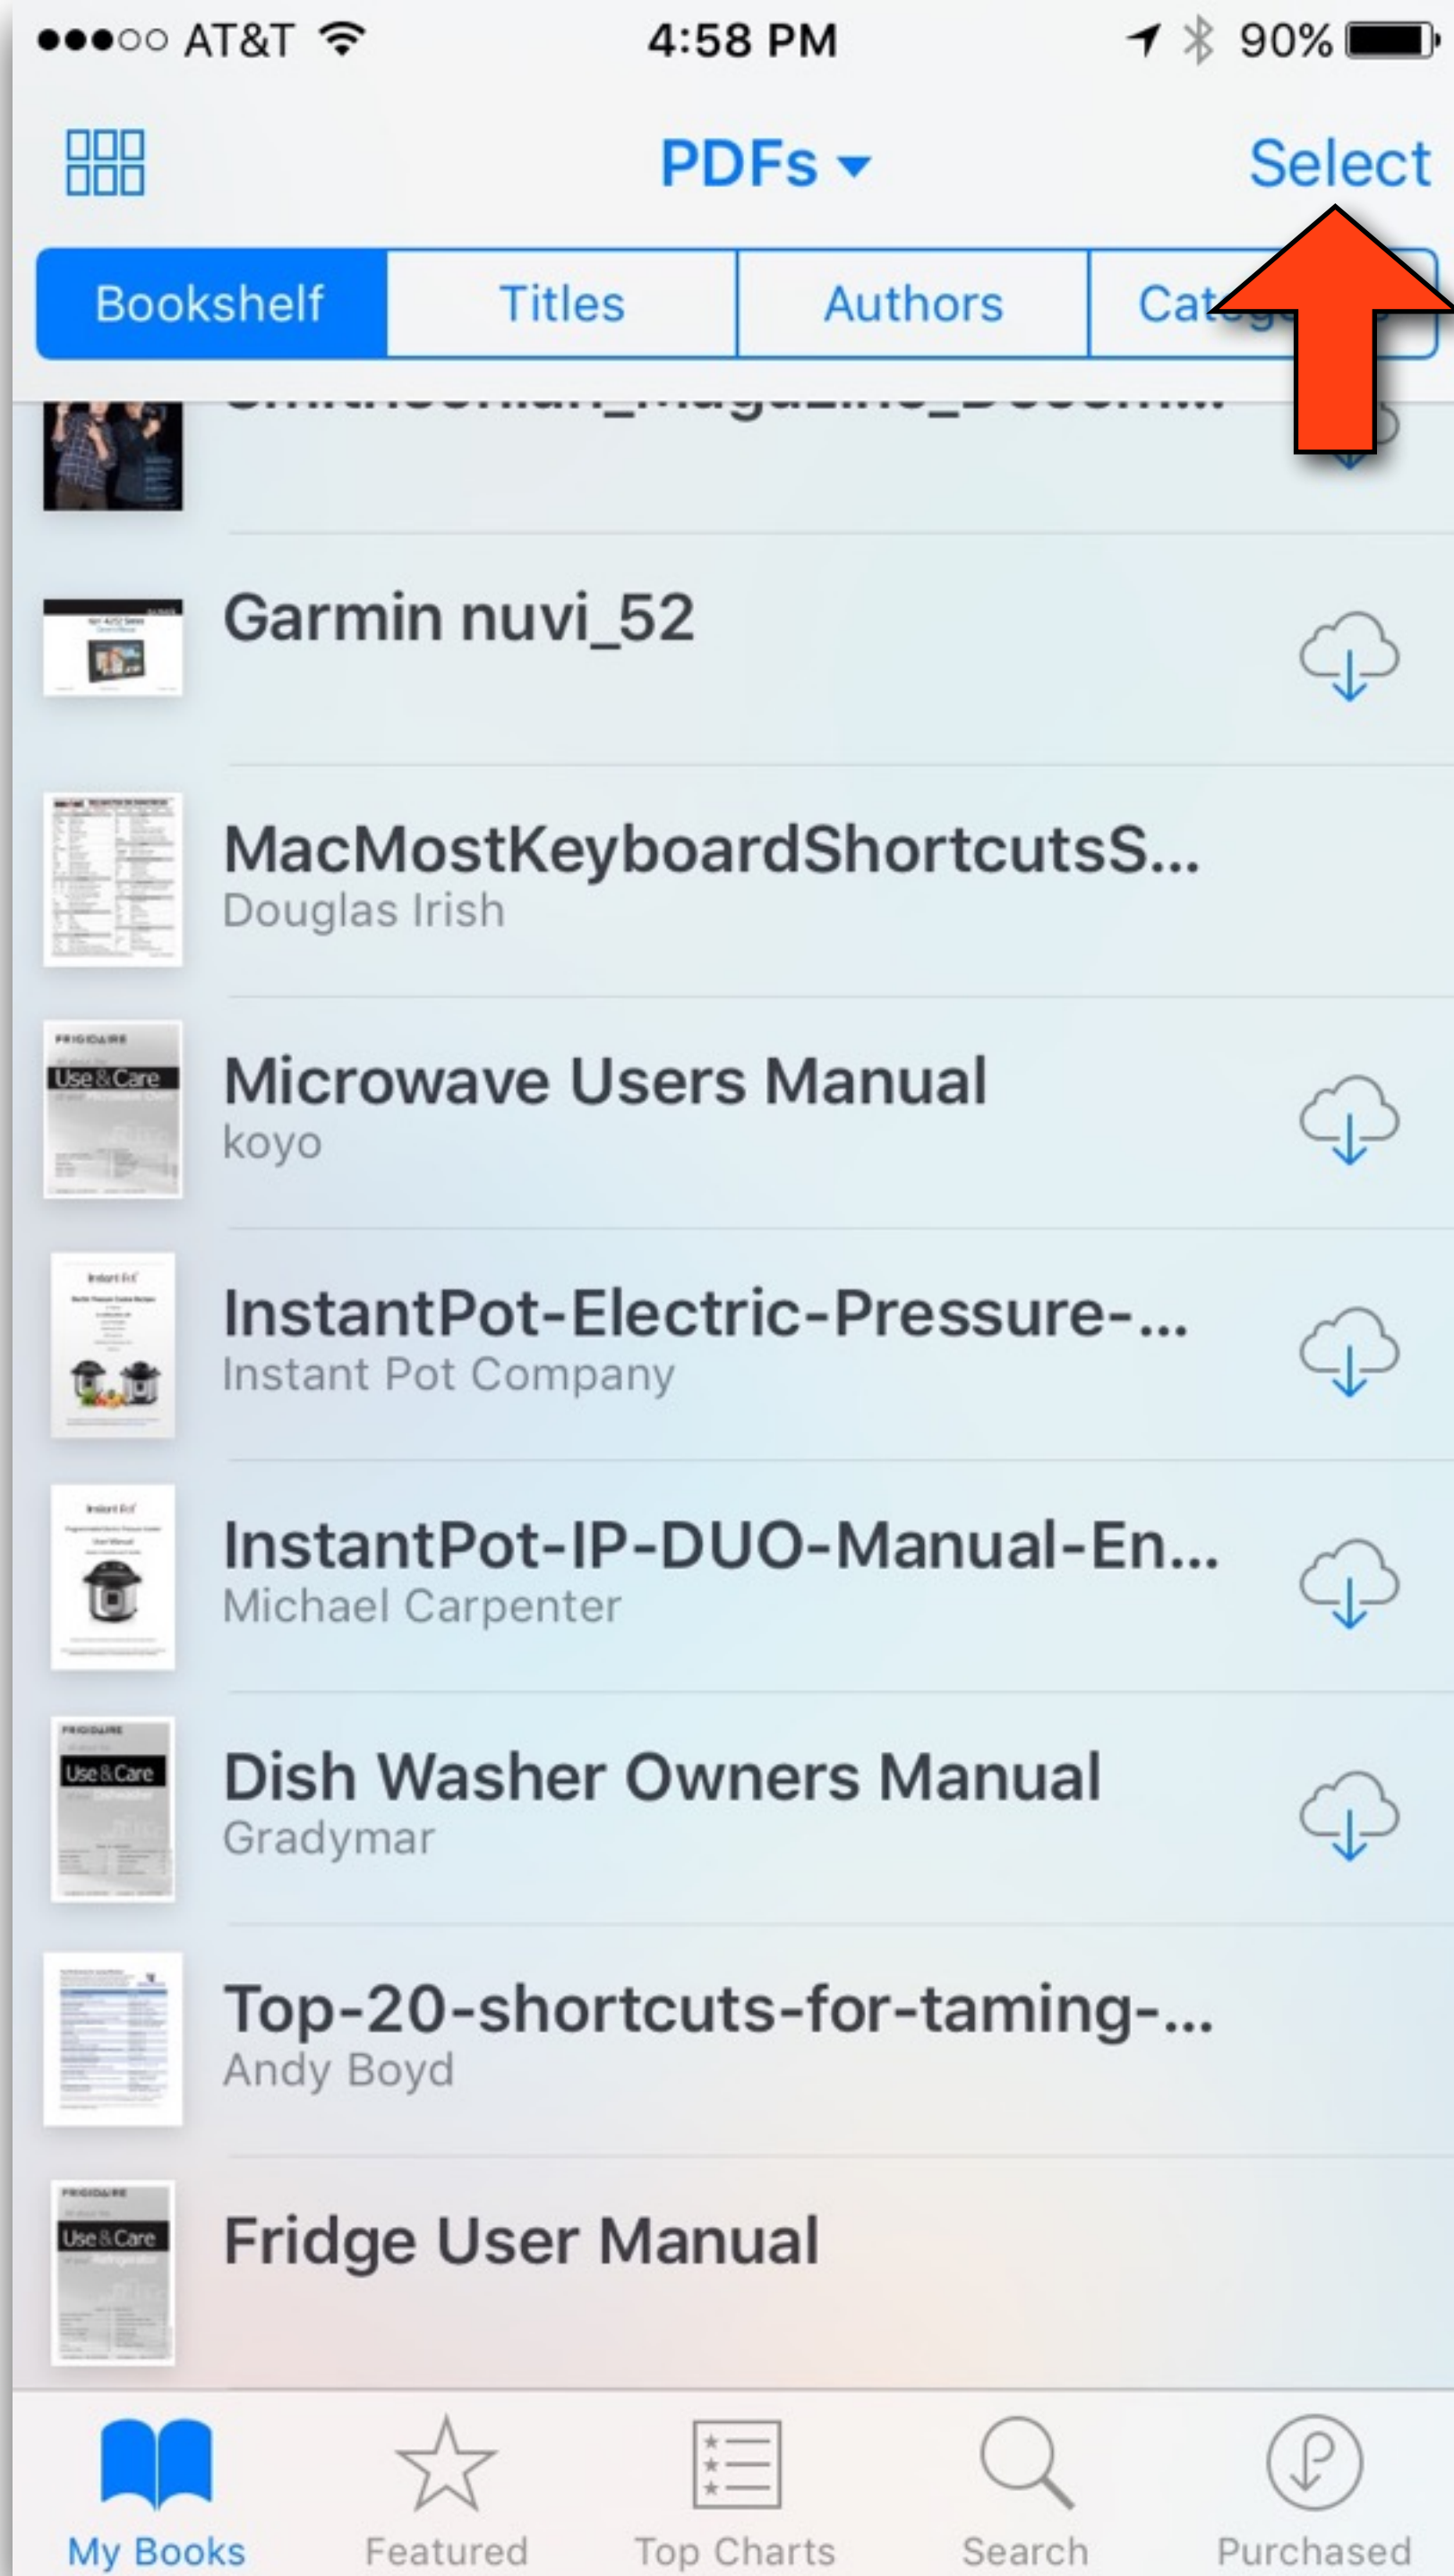

Mac

On a Mac, just drop and drag

My Distribution List

- Let me know:
 - If you wish to be added (Need: name and email address)
 - If you wish to be removed
 - If you change your email address
 - If you stop getting emails for no reason. If I get failures several times for an individual, I'll remove the name from my list

One on One Training

- Reminder: Free “one on one” training sessions are available on Mondays between 1pm and 3pm in Lab (Except the last Monday of the month)
- Bring your own iPhone, iPad, or Mac. (or we can use the iMAC in the lab)
- Training is by appointment only. Email me or use the form on the Senior Surfer Web Site.

Any Questions?

Thank You!
