My Distribution List

- I use my distribution list to send out meeting notices, links to presentations, and occasionally notices that I think are important to the Apple community
- To get on or off my distribution list, send a message to irishdf@me.com
- Note: When I get failures several times for an individual, I remove the name from my list, so if you suddenly stop getting my emails and want to get back on, send me a note.

Doug Irish
Just now · Newark

Apple has announced a presentation on October 27th that appears to be about new Macs. Therefore it's probably a very bad time to buy a new Mac before the 27th.

DESCRIPTION Edit

Newark Senior Center - Apple User Group

Apple News!

Apple News

- A Chinese woman reportedly got each of her twenty boyfriends to buy her an iPhone 7, then turned around and sold them all to buy a house. 😀
- Apple has dissolved the division which develops the AirPort Express, AirPort Extreme, and AirPort Time Capsule. The wireless routers are still available for purchase for now.
- Apple will replace some iPhone 6s batteries that are having unexpected device shutdowns. This covers devices manufactured between September and October 2015

Apple Book

- Apple just announced a hardbound photo book titled "Designed by Apple in California"
- It's available in two sizes, a 10.2 x 12.8 inch version for $199 and a 13 x 16.3 inch version for $299.
- The cover of the book is white with an embossed Apple logo on the front cover and "Designed by Apple in California" embossed on the spine
- The book doesn't contain any text. It's a collection of 450 photos starting with the first iMac in 1998 and ending with the Apple Pencil.
- Here's a video describing the book.

Questions Submitted

Question

- I would like to know a name of a good publishing program that I can use on my MAC to make cards. I have PrintMaster and it does not work very well

Mac Publishing

- I don't don't have much experience in this, so I can't help directly except to maybe point you towards some solutions
- If I wanted to do something like this, I would start with Pages. Pages allows you to easily combine graphics and text.
- Then, if Pages doesn't do the trick, the Mac App store has a $20 program called Swift Publisher 4 which is rated 4+ out of 5

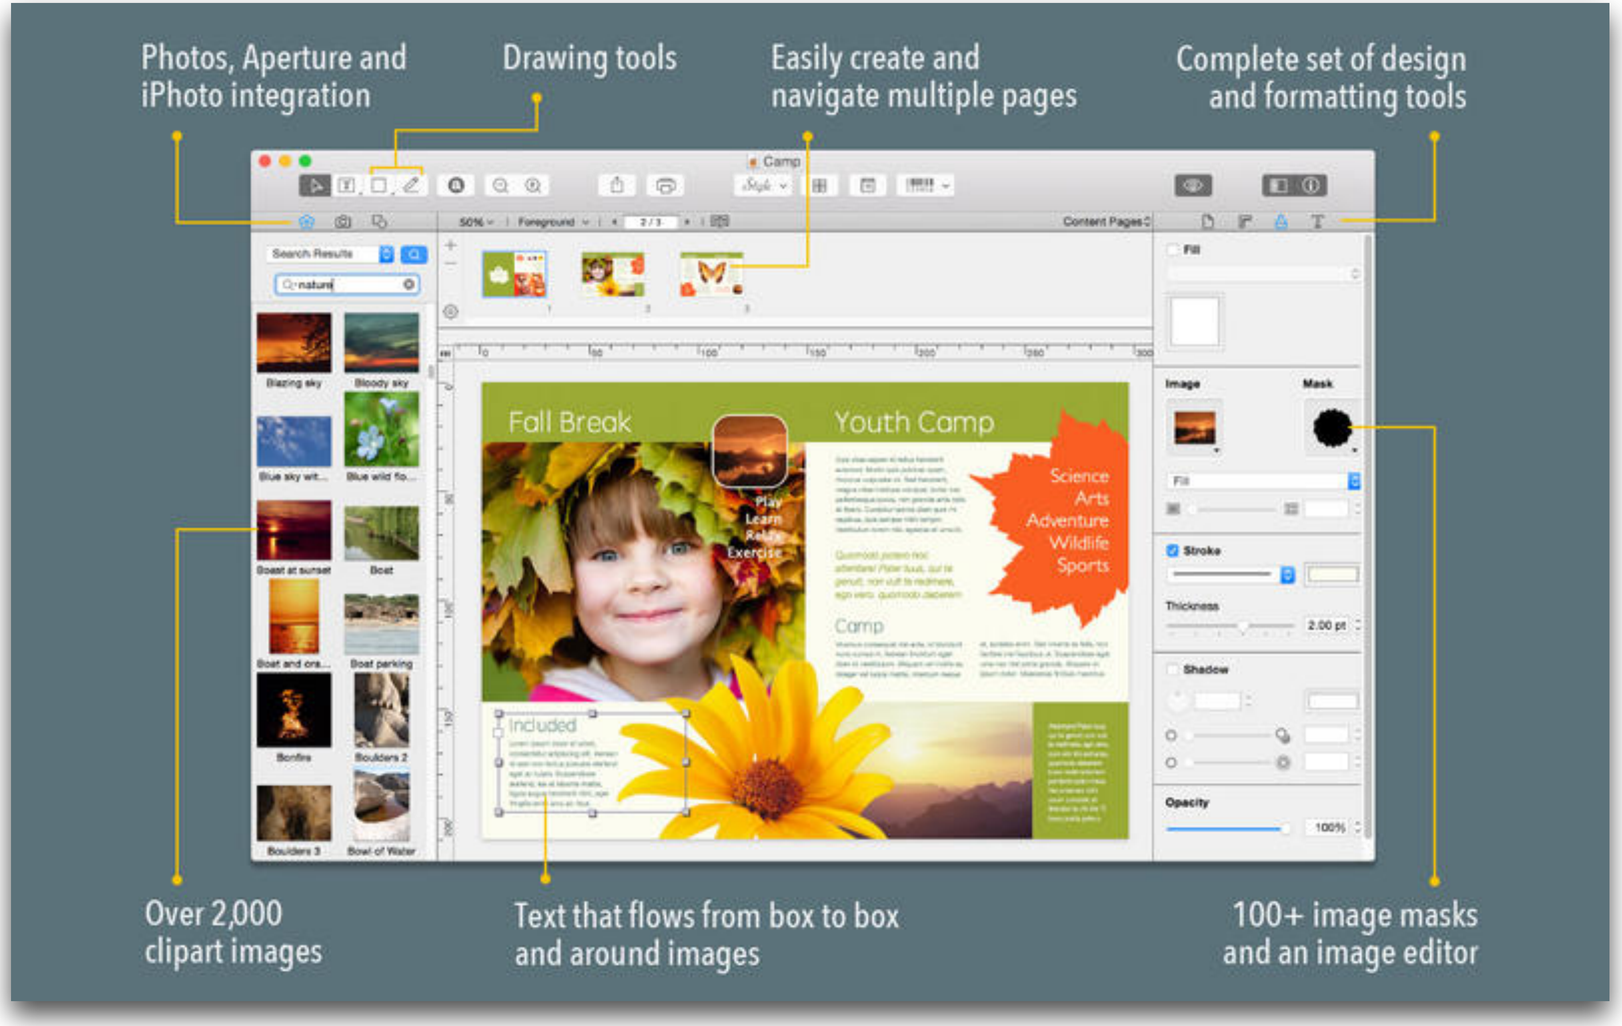
Swift Publisher 4

- Has over 300 pre-designed templates
- You can import photos from Photos, iPhoto or Aperture
- It contains over 2,000 Clipart Images, photos, and illustrations
- It has the ability to create flowing text boxes, and vertical and circle text tools
- You can print booklets and have the page numbers display correctly
- Export to PNG, TIFF, JPEG, EPS, and PDF: Export your projects to the most popular image formats and send them to a print shop

Swift Publisher 4



Question

- I'd like a class just focused on editing videos to create movies with iMovie and Photos from the Cloud/Library and from the computer, including importing from iPhone or camera to desktop, editing and converting to DVD, etc.

iMovie

- This is another area that I only have a casual knowledge. I've played with it, but not extensively enough or recent enough to be able to conduct a class on it. Some thoughts:
  - Apple does have workshops from time to time on this topic
  - There are a number of iMovie Tutorial apps in the Mac App store
  - There are a lot books on this subject as well (Make sure the book or app is for iMovie version 10)

macmost

Question

- Talk about cybersecurity

Cybersecurity

- I talked about this in last months October's meeting
- Please review the PDF version of the talk
- If there are specific areas where you'd like more information, let me know

Question

- Could you discuss what IOS 10 can do that IOS 9 cannot?

iOS 10

- I've covered the new features of iOS10 extensively in both my June and September presentations
- You can find my presentation from the emails I send out or use the Senior Surfers web site in the Apple section
- You can also go to Apple web site, click on iPhone, then iOS 10 and you'll get a very good overview of iOS 10

Question

- I have an Apple air. When I go to open safari, two screens open. One on the right and one on the left.
- Why does this happen?

Split View

- You have inadvertently opened up the Split View feature of Safari which is new in iOS 10
- To use Split View you must be in landscape mode
- To create a Split View you can:
  - Press and hold the tabs button and select open in Split view
  - Press and hold a link on a page and select open in Split view
  - Press and drag a tab down and to the right or left
- To cancel Split View either close the tab (hit the small x) or Press and hold the tabs button and select Merge all Tabs

Question

- My Apple products are connected, so that means the two laptops, iPad and iPhone all get the photos. But so does my husbands Mac.
- I would like to remove the connection from the Mac but can't figure out how to do this.
- Please explain.

iCloud

- The reason your “Apple products are connected” (including the Mac) is that your photos are being synced through iCloud by PhotoStream or iCloud Photos
- To turn it off go to system preferences > iCloud and select “options”
- Then, turn off both PhotoStream and iCloud Photos

Graphic Template

Question

- I think a lot of people would be interested in iCloud. I think it is easy to get iCloud, but what about syncing your various devices?
- Another related question…

Question

- My kids have gifted me with an Apple; iPad, iPhone and iWatch. And with my MS tower; wifi service and router - all four devises "seem to" communicate with each other, every day I come home.
- If I make one change to my contact list on any one of my three portable devices, at any time, no matter where I may be at that time; when I come home the change seems to occur automatically, via the router on all of devices including my MS tower, just when I walk into my apartment.
- Is this true? If so, I do not understand this technology. Is this proprietary Apple or MS or industry standards?

iCloud

- iCloud is composed of Apple servers and iCloud can be used to sync your devices
- What you sync in iCloud is controlled in the Settings app in iOS and in System Preferences on the Mac
- You can sync: Photos, Files, Contacts, Calendars, Reminders, Notes, etc…
- There is a Windows iCloud app that you can use to sync some settings on a Windows device

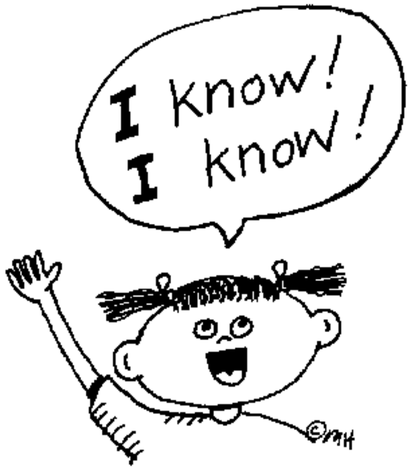
Questions from the floor

- If you have a question, raise your hand
- I'll take one question at a time and attempt to answer
- If I don't know or if it'll take too long to answer, I'll defer it to another time
- If you can show us your issue on your iPhone or iPad, I'll attempt to put it on the overhead so everyone can see it
- If anyone else can add anything, please raise your hand and feel free to contribute



Thank You!
